# RETIREMENT PLAN ADVISORY COMMITTEE

## MEETING MINUTES

September 22, 2020, 2:00 p.m.

Zoom Virtual Meeting Room

Meeting ID: 399-700-0062 / Password: LCBOC

<https://zoom.us/j/3997000062?pwd=SUdLYVFFcmozWnFxbm0vcHRjWkVIZz09>

Members Present:

Cindy Catanach, Nathan Burd, Jennifer Nash, Kate Lawrence, Jennifer Palmbos, Jennifer Slater, and Jeff Warder

### 1. CALL MEETING TO ORDER

The meeting was called to order by Cindy Catanach at 2:01 p.m.

### 2. APPROVAL OF MINUTES

Meeting Minutes Dated: September 2, 2020

Motion to approve the minutes as presented.

**Moved by:** J. Palmbos

**Seconded by:** J. Slater

Yes (6): C. Catanach, N. Burd, K. Lawrence , J. Palmbos, J. Slater , and J. Warder

Absent (1): J. Nash

**Motion Carried (6 to 0)**

### 3. APPROVAL OF AGENDA

Motion to approve the Agenda as presented.

**Moved by:** K. Lawrence

**Seconded by:** J. Slater

Yes (6): C. Catanach, N. Burd, K. Lawrence , J. Palmbos, J. Slater , and J. Warder

Absent (1): J. Nash

**Motion Carried (6 to 0)**

### 4. CALL TO THE PUBLIC

None.

## 5. PLANTE MORAN FINANCIAL ADVISORS

Cindy turned the floor over to Dori Drayton, PMFA.

### 5.1 Consolidation

#### a. Great-West Guaranteed Government Fund

Dori reported to members on the discussions with Empower regarding options to terminate the Guaranteed Fund Contract. Dori reviewed the two possible options for termination.

#### b. Termination Notice

A Book or Market Value payout analysis would be conducted by Empower upon receiving notice of intent to terminate the contract. The payout would be the lesser value. The current ratio of 102.7% would mean a payout of one-hundred cents on the dollar, this may change depending on when the analysis is conducted.

Dori answered questions from Committee members

PMFA's recommendation is to continue moving forward with the process to consolidate to one provider.

## 6. DISCUSSION

Members discussed scenarios of outcomes of the value analysis completed by Empower.

Meeting schedules were discussed and confirmed. PMFA will attend the Personnel Committee on October 21st; the Finance Committee on November 4th; and the Board of Commissioners meeting on November 9, 2020.

## 7. ADJOURNMENT

Motion to adjourn the meeting at 2:24 p.m.

**Moved by:** K. Lawrence

**Seconded by:** N. Burd

Yes (6): C. Catanach, N. Burd, K. Lawrence , J. Palmbos, J. Slater , and J. Warder

Absent (1): J. Nash

**Motion Carried (6 to 0)**

SECTION 1: RETIREMENT INDUSTRY UPDATES	
Industry Updates.....	

## THE FINAL FRONTIER

The SECURE Act eliminated major barriers to the adoption of guaranteed retirement income investments in defined contribution plans, including fiduciary liability concerns for annuity provider selection and portability at the participant level. It also shed new light on the topic of retirement income at a time when more participants are keeping their assets in their employers' plans after retirement.

According to T. Rowe Price, in 2012 45% of participant assets remained in a plan at least one year after retirement. By 2018, that number had risen to 61%.<sup>1</sup> Data from the University of Michigan's Health and Retirement Study shows a similar story—between 2016 and 2018, only 13% of participants withdrew their entire plan balance or rolled it over to an IRA at retirement.<sup>2</sup> Given these trends, the topic of how best to help prepare participants for—and support them during—the decumulation stage of retirement is an important one.

1

### PARTICIPANT EDUCATION AND ADVICE

Participants need advice about the timing of Social Security benefits, budgeting, withdrawal strategies, creating an appropriate investment portfolio, and education around benefits of staying in the plan.

2

### WITHDRAWAL OPTIONS/PROGRAMS

Systematic or periodic withdrawal options are now more prevalent among plan sponsors. Some recordkeepers have built enhanced programs to support participants' withdrawal strategy needs. Some also offer out-of-plan annuity placement services.

3

### MANAGED ACCOUNTS

Managed account programs may offer pre-retirement planning assistance and post-retirement withdrawal strategy and Social Security recommendations.

4

### GUARANTEED INVESTMENTS

Guarantees can take the form of a guaranteed lifetime withdrawal benefit (GLWB), qualified longevity annuity contract (QLAC), or deferred fixed annuity. They can be integrated into a default solution or offered as a standalone. Fees vary widely.

5

### NON-GUARANTEED INVESTMENTS

Income-oriented strategies can include managed payout funds, yield-focused fixed income strategies, or through retirement target date funds.

# 68%

of plan participants reported a need for advice or support in managing a plan to convert retirement assets into a stream of income.<sup>1</sup>

<sup>1</sup>"Bridging the Gap Between Accumulation and Decumulation for Participants," T. Rowe Price, March 2020

<sup>2</sup>Health and Retirement Study (HRS Core) Public Data Set, University of Michigan

## PLAN SPONSOR CHECKLIST

Retirement income planning is a holistic concept centered around meeting the needs of participants in and nearing retirement. It's important for plan sponsors to understand all their options and what their plan providers can support. The solution for retirement income isn't one-size-fits-all, and it may include multiple options. Plan sponsors should focus on what option or options will meet the specific needs of their participants and help further a specific goal they're trying to achieve.

### QUESTIONS TO ASK WHEN SELECTING A RETIREMENT INCOME SOLUTION:

1. Do you want the solution to be offered in-plan or out-of-plan?
2. Should the solution be guaranteed?
3. Will the solution be offered as opt-in or opt-out?
4. How important is recordkeeper portability?
5. How important is participant liquidity?
6. Do you want unique solutions focused on accumulation and decumulation or prefer a single solution for both sets of needs?

### CONSIDERATIONS FOR RETIREMENT INCOME SOLUTIONS:

1. What are the implicit and explicit costs of the solution you're considering?
2. How will you communicate the solution to your participants (i.e., call center, website, quarterly statements, employee meetings, etc.)?
3. How will you measure effectiveness?
4. What are your fiduciary responsibilities related to selecting and monitoring your solution?
5. What kind of educational resources will you provide to participants at launch and ongoing?

## FIDUCIARY UPDATE

The IRS and the DOL have both been busy providing additional guidance for plan sponsors regarding the SECURE Act, and, as 2020 comes to a close, certain CARES Act provisions also come to an end.

### LIFETIME INCOME DISCLOSURE (INTERIM FINAL RULE)

The DOL has provided the assumptions to be used by parties producing benefit statements with monthly retirement payment illustrations. For DC plans, the payment is based on the person's current account balance. Key assumptions include:

- Commencement at age 67
- Spousal and survivor benefits
- Interest rate tied to the 10-year Treasury
- Mortality using a gender-neutral IRC table
- Expressed as a single life annuity and a qualified joint and survivor annuity

Additional rules apply for in-plan annuities. The rule is subject to a 60-day comment period that began September 18, 2020. The rule will be final on September 18, 2021.

### QUALIFIED BIRTH OR ADOPTION DISTRIBUTIONS (QBADs)

- Available since January 1 from multiple plan types for distributions taken within 12 months of the birth or adoption of an eligible adoptee. The guidance defines an eligible adoptee.
- Distribution is exempt from the 10% early withdrawal penalty.
- \$5,000 in aggregate per parent per birth or adoption.
- Distributions may be repaid. IRS to issue further guidance.
- QBADs cannot be rolled over.
- Classified as an optional distributable event so plans do not have to add the feature.
- Participants may claim QBADs even if their plans do not offer them. These may be repaid into an IRA.

### LONG-TERM, PART-TIME EMPLOYEE COVERAGE IN 401(K)S

- Effective beginning in 2021.
- Must be employed for 3 consecutive 12-month periods, with at least 500 hours each period. Employer contributions are not required; workers can be excluded from discrimination testing.
- If workers receive employer contributions, for vesting purposes, the employer must consider each 12-month period that the employee had 500 hours, starting from his or her hire date.

### CARES ACT REMINDERS

- Access to increased plan loan amounts ended September 23.
- Certain loan repayments may be delayed up to one year, but interest continues to accrue. Loan terms can be extended one year.
- Access to penalty-free early distributions for COVID-related events are available until December 30.
- Distributions may be repaid over three years beginning in 2020.

For more Fiduciary Updates, visit [captrust.com](https://captrust.com). Information contained here is provided for general information purposes and is not intended to constitute legal advice. Please contact your ERISA counsel to determine how the laws or cases discussed might apply to your plan, plan fiduciaries, or plan participants.

## FIDUCIARY UPDATE—DUTY OF PRUDENCE

Fiduciary training is a critical part of being a fiduciary and a way to minimize fiduciary risk through education and governance. The Department of Labor views fiduciary training as an important element to managing a retirement plan and frequently looks for evidence of formal fiduciary training during plan investigations. A good fiduciary curriculum covers a range of topics—from an overview of ERISA to best practices for monitoring investments. In this installment, we cover the duty of prudence, one of the core fiduciary duties required by ERISA.

### DUTY OF PRUDENCE

**The duty of prudence is linked to the processes used to evaluate options, make decisions, and document actions. Fiduciaries should strive for a strong, consistent, and defined process that focuses on making sound fiduciary decisions in the best interest of participants. This approach will help a committee make good decisions and demonstrate both the processes and procedures they have in place and their commitment to fulfilling their fiduciary duties.**

#### Prudent Expert

- The bar is high, and you are expected to make decisions demonstrating expertise.
- The Department of Labor encourages hiring experts if committee members do not possess the expertise needed to act in a fiduciary capacity.

#### Procedural Prudence

- Create and consistently follow a good process. Document the process and the decisions made through meeting reports and minutes, investment policy statements, benchmarks, and regular reports.
- Engage in the process by meeting regularly, vigorously discussing issues, and requiring training.

#### What Should Plan Fiduciaries Consider?

- Formalize meetings with agendas, record minutes, and hold ad hoc meetings as necessary.
- Select committee members with expertise that is beneficial in making plan decisions in the best interest of all employees.
- Require meeting attendance.

### FIDUCIARY DUTIES UNDER ERISA

- **Duty of prudence**
- Duty of loyalty
- Duty to diversify
- Duty to monitor and supervise
- Duty to ensure reasonable fees
- Duty to avoid prohibited transactions

SECTION 2: MARKET COMMENTARY AND REVIEW

Market Commentary.....

Market Review.....

Asset Class Returns.....

Index Performance.....

## STRONG Q3 RESULTS

Despite September's pullback, all asset classes have rallied from March's market lows, including solid gains in the third quarter. Historic levels of fiscal stimulus and monetary policy support buoyed markets mid-year, but uncertainties about the spread of COVID-19, a contentious election season, and the future of another round of stimulus have recently crept into investors' psyches.

- U.S. stocks posted strong gains in the third quarter and are now in positive territory for the year. A deeper look reveals a sharp contrast between this year's leading and lagging stocks.
- International developed and emerging market stocks rallied in the third quarter, but they trail U.S. stocks by a wide margin for the year. Emerging market stocks were the third quarter's standout performer, benefiting from China's economic recovery and a weaker U.S. dollar.
- Bonds have outpaced stocks so far this year and played an important portfolio stabilizer role as interest rates have fallen to historically low levels amid stock market volatility.
- While real estate typically benefits from falling interest rates, that has not been the case this year due to the impact of COVID-19-related office closures and the economic shutdown on the office and retail sectors.

Asset class returns are represented by the following indexes: S&P 500 Index (U.S. large-cap stocks), MSCI EAFE Index (international developed stocks), MSCI Emerging Markets Index (emerging market stocks), Bloomberg Barclays U.S. Aggregate Bond Index (U.S. bonds), and Dow Jones U.S. Real Estate Index (real estate).

## DIGGING DEEPER: STOCKS AND BONDS

### Equities

	Q3 2020	YTD 2020	Last 12 Months
U.S. Stocks	8.9%	5.6%	15.1%
• Q3 Best Sector: Consumer Discretionary	15.1%	23.4%	28.9%
• Q3 Worst Sector: Energy	-19.7%	-48.1%	-45.2%
International Stocks	4.8%	-7.1%	0.5%
Emerging Market Stocks	9.6%	-1.2%	10.5%

### Fixed Income

	09.30.20	06.30.20	09.30.19
1-Year U.S. Treasury Yield	0.12%	0.16%	1.75%
10-Year U.S. Treasury Yield	0.69%	0.66%	1.68%
	QTD 2020	YTD 2020	Last 12 Months
10-Year U.S. Treasury Total Return	0.06%	12.77%	10.78%

### Equities - Relative Performance by Market Capitalization and Style

Q3 2020				YTD 2020				Last 12 Months			
	Value	Blend	Growth		Value	Blend	Growth		Value	Blend	Growth
Large	5.6%	8.9%	13.2%	Large	-11.6%	5.6%	24.3%	Large	-5.0%	15.1%	37.5%
Mid	6.4%	7.5%	9.4%	Mid	-12.8%	-2.3%	13.9%	Mid	-7.3%	4.6%	23.2%
Small	2.6%	4.9%	7.2%	Small	-21.5%	-8.7%	3.9%	Small	-14.9%	0.4%	15.7%

Sources: Bloomberg, U.S. Treasury. Asset class returns are represented by the following indexes: S&P 500 Index (U.S. stocks), MSCI EAFE Index (international stocks), and MSCI Emerging Markets Index (emerging market stocks). Relative performance by market capitalization and style is based upon the Russell US Style Indexes except for large-cap blend, which is based upon the S&P 500 Index.

The S&P 500 Index is a market-capitalization-weighted index of U.S. large-cap stocks across a diverse set of industry sectors. The stocks represented in these 11 sectors generated a range of returns for the year to date and the most recent quarter.

CAPTRUST

## DIGGING DEEPER: FIXED INCOME MARKET

Interest Rates	3 Months	2 Years	5 Years	10 Years	30 Years	Mortgage Rate
June 2020	0.16%	0.16%	0.29%	0.66%	1.41%	3.27%
September 2020	0.10%	0.13%	0.28%	0.69%	1.46%	3.08%
Change	-0.06%	-0.03%	-0.01%	0.03%	0.05%	-0.19%

Treasury rates remained roughly unchanged for the quarter after a precipitous drop earlier in the year. Mortgage rates declined, providing continued support to the housing market.

Bloomberg Barclays U.S. Aggregate Bond Index	Yield to Worst	Duration	Total Return Q3 2020	Spread	Treasury Rate	AA Spread	BBB Spread
June 2020	1.25%	6.04	0.62%	0.68%	0.57%	0.88%	1.98%
September 2020	1.18%	6.12		0.60%	0.58%	0.80%	1.76%
Change	-0.07%	0.08		-0.08%	0.01%	-0.08%	-0.22%

Although modest, the index's yield was the largest contributor to performance for the quarter. Corporate spreads, primarily BBB spreads, were also a significant return contributor.

Bloomberg Barclays U.S. Long Credit Index	Yield to Worst	Duration	Total Return Q3 2020	Spread	Treasury Rate	AA Spread	BBB Spread
June 2020	3.16%	15.03	1.97%	2.02%	1.14%	1.42%	2.51%
September 2020	3.05%	15.12		1.88%	1.17%	1.34%	2.32%
Change	-0.11%	0.09		-0.14%	0.03%	-0.08%	-0.19%

The decline in credit spreads, particularly BBBs, was the index's primary performance driver. The index's yield was also a meaningful contributor, outweighing a modest increase in Treasury rates.

Sources: Bloomberg, U.S. Treasury, CAPTRUST Research

## ECONOMIC OUTLOOK

Financial markets and some measures of economic activity have sharply improved since the first quarter. Here, we provide our perspective on the balance between the significant headwinds that remain and the tailwinds that could accelerate the economic healing process.

### HEADWINDS

#### Virus Threat Persists

- Virus cases are rising after a summer reprieve, underscored by positive test results for the U.S. president and first lady. This raises concerns over new restrictions, delayed reopenings, and continued challenges for the hardest-hit industries.

#### A Slower Jobs Recovery

- The U.S. economy added 11.4 million jobs between May and September, a rapid rebound from the spring. Yet this represents only half of the jobs lost in March and April—and gains from here are likely to be harder-won.

#### Stalled Relief Measures

- As relief measures wind down, political tensions risk stalling the next round of stimulus, posing risks to consumer income, confidence, and gross domestic product (GDP) recovery.

#### Elections

- Although history shows that markets can perform well under any division of power, investors continue to consider policy implications of election scenarios, along with the risks posed by the potential for a contested or delayed outcome.

### TAILWINDS

#### A Committed Fed

- After pulling out all the stops with pedal-to-the-metal stimulus in its initial response to the pandemic, the Federal Reserve has followed through with assurances that monetary support will persist.
- The recent policy shift toward “average inflation targeting” provides the Fed more flexibility to maintain exceptionally low policy rates for longer, to offset long periods of below-target inflation.

#### Housing Market Strength

- Fueled by record-low mortgage rates, home purchases and improvements remain a bright spot and contributor to economic recovery.
- Home sales reached a 14-year high as some buyers took advantage of record-low mortgage rates. At the same time, lower-than-usual inventory levels have fueled home price appreciation of more than 11% annually.

#### Lower Financing Costs Lightens Debt Burden

- Exceptionally low interest rates have helped blunt the impact of record levels of public and private borrowing.

While the COVID-19 virus remains a formidable headwind, given the backdrop of accommodative policy, meaningful progress on vaccines and an election resolution could fuel a continued recovery.

## ELECTIONS: MARKETS CAN PROSPER IN A VARIETY OF SCENARIOS

Polls are fluctuating as we enter the 2020 election season's home stretch. Much can change in the final weeks. Should there be changes in party control of the White House or Congress, policy changes could affect companies and industries in different ways. Even so, history tells us that markets can perform well under any combination of party control.

Average Annual S&P 500 Performance  
and Total Years of Scenarios  
(1933-2019, Excludes 2001-02)

### OBSERVATIONS

- The S&P 500 has achieved double-digit growth with both one-party and divided governments.
- Historically, the strongest returns have occurred with a split Congress, regardless of the party in the White House.
- The benefit of predicting election outcomes and acting on them in advance has proven uncertain—even if the predictions prove correct.
- Investors who correctly predicted President Trump's 2016 win and overweighted policy-favored sectors prior to the election would have underperformed investors who waited until after the election and those who made no changes at all.

Sources: Strategas, CAPTRUST Research. Returns are based on price index only and do not include dividends.

## LABOR MARKET RECOVERY: FROM BOUNCE TO GRIND

This spring, unemployment claims reached never-before-seen levels as a result of widespread lockdowns and efforts to contain the pandemic. Since then, initial claims for unemployment have shown a consistent downward trend—a positive sign. However, the rate of change has slowed considerably, suggesting that the second half of the jobs recovery may take much longer than the first.

### OBSERVATIONS

- Initial jobless claims fell rapidly through April and May, supported by massive fiscal stimulus packages.
- Since then, the rate of decline in initial claims has slowed.
- Additional fiscal stimulus efforts critical to continued jobs recovery have become bogged down in a pre-election political logjam. Without such a deal, airlines could be facing tens of thousands of job cuts.
- As the crisis continues, salaried and management-level jobs are increasingly at risk. Several major companies have announced job cuts, including Walt Disney, Allstate, and Goldman Sachs.

Source: Bloomberg

## NO PLACE LIKE HOME DURING THE PANDEMIC

A potent combination of forces has buoyed the housing market, creating a bright spot in the economy and providing support for jobs and income. Homebuyers have raced to take advantage of record-low mortgage rates, with the greatest demand in lower-cost and less-crowded suburban markets. Meanwhile, tighter inventory and input costs have propelled home prices to new highs as demand has outstripped supply.

### OBSERVATIONS

- Existing and new home sales surged to 14-year highs in August, and home prices have surpassed the 2007 housing bubble peak by 19%.
- New homes are not being built fast enough to meet demand. At the current rate, it would take just 3.3 months to exhaust supply, the shortest period on record. A six-month supply is considered a balanced market.
- Input costs are rising. Lumber prices have jumped more than 170% since mid-April, adding \$16,000 to the price of an average new home, driven by higher demand and supply shortages caused by mill shutdowns during the pandemic.
- The combination of low supply, high demand, and rising construction costs could impact home affordability despite mortgage rates below 3%. Over the past year, the rise in home prices has more than offset mortgage payment savings for the average home.

Sources: Bloomberg, National Association of Home Builders

## WIDENING GAP BETWEEN WINNERS AND LOSERS

Amid the unique challenges of a global pandemic, some companies and industries have prospered, while others have been severely impacted, a very uneven environment that has been described as a K-shaped recovery. This year, the price performance spread between the best-performing (technology) and worst-performing (energy) sectors has reached levels not seen since the tech bubble 20 years ago.

### OBSERVATIONS

- So far this year, the S&P 500's technology sector has shown price appreciation of 28% while the energy sector is down by 50%—a performance gap of 78%. This far exceeds the average spread of 44% over the past 30 years.
- Stock prices are influenced both by the level of earnings and by investors' willingness to pay for those earnings (valuations). As shown above, earnings growth expectations for sectors experiencing tailwinds in the current environment (e.g., technology, health care, and consumer staples) are vastly different from the more cyclical sectors most directly impaired by the crisis.
- Through 9.30, the five largest stocks within the S&P 500 showed a 32% gain, while the remaining 495 companies have declined 3%.

Sources: FactSet. Earnings growth is as of 9.25.2020. Bloomberg. 2020 performance is unannualized return as of 9.30.2020. Returns are based on price index only and do not include dividends.

The CAPTRUST Investment Policy Monitor ("Scorecard") is an illustration of our monitoring system and is designed to assist our clients in their efforts to provide fiduciary oversight to investment assets. It is not intended as a solicitation to buy any security. The scoring system measures quantitative areas as well as qualitative (or subjective) fields for actively managed investment options. Quantitative scoring areas include Risk Adjusted Performance (3 & 5 yr.); Performance vs. Relevant Peer Group; Style Attribution; and Confidence. Qualitative Scoring Areas measure the quality of the Management Team while also considering the stewardship of the investment option's parent company under Investment Family Items. Qualitative areas of analysis are subjective in nature. CAPTRUST typically requires at least 3 months of monitoring before including an investment in this report. Investments that have been added to our system less than 3 months prior to a report being generated may have a Fund Management assessment of '25' as a default, but will be updated, if necessary, after the first quarter of monitoring to more accurately reflect our system. Investments that are not mutual funds or have less than 3 years of performance history may not be scored. This material is for institutional investor use only and is not intended to be shared with individual investors.

The CAPTRUST Financial Advisors Investment Scorecard is an illustration of our monitoring system and is designed to assist our clients in their efforts to provide fiduciary oversight to investment assets. It is not intended as a solicitation to buy any security. The scoring system measures quantitative areas as well as qualitative (or subjective) fields. Quantitative scoring areas for target date funds include Risk Adjusted Performance (3 & 5 yr.); Performance vs. Relevant Peer Group; and Glidepath. Qualitative Scoring Areas for target date funds measure the quality of the Management Team while also considering the stewardship of the investment option's parent company under Investment Family Items. Qualitative areas of analysis are subjective in nature. Qualitative Scoring for Target Date funds also includes a score for Portfolio Construction and Underlying Investment vehicles to express CAPTRUST's views on the manager or strategy. CAPTRUST typically requires at least 3 months of monitoring before including an investment in this report. Investments that have been added to our system less than 3 months prior to a report being generated may have a Fund Management assessment of '25' as a default, but will be updated, if necessary, after the first quarter of monitoring to more accurately reflect our system. Investments that are not mutual funds or have less than 3 years of performance history may not be scored. Capital Preservation options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics, depending on the type of capital preservation option being evaluated, and may include quantitative criteria such as: Crediting Rate/Yield, Market to Book Ratio, Average Crediting Quality, Insurer Quality/Diversification, Duration, and Sector Allocations, and/or qualitative criteria such as quality and experience of the Management Team and stewardship of the investment option's parent company. Passively Managed options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics and may include quantitative criteria such as: Tracking Error, Fees, and Performance versus relevant peer group, and/or qualitative criteria such as index replication strategy, securities lending practices, and fair value pricing methodology. Distinct investment options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics. This material is for institutional investor use only and is not intended to be shared with individual investors.

## PASSIVE INVESTMENTS

INVESTMENT	Overall	Commentary
Fidelity US Bond Index		This fund currently meets the guidelines set forth by CAPTRUST for passively managed investments. This assessment is based on both quantitative and qualitative data. Examples of quantitative and qualitative items considered include, but are not limited to, quality of management, tracking error, and cost.
Fidelity 500 Index		This fund currently meets the guidelines set forth by CAPTRUST for passively managed investments. This assessment is based on both quantitative and qualitative data. Examples of quantitative and qualitative items considered include, but are not limited to, quality of management, tracking error, and cost.
Fidelity Mid Cap Index		This fund currently meets the guidelines set forth by CAPTRUST for passively managed investments. This assessment is based on both quantitative and qualitative data. Examples of quantitative and qualitative items considered include, but are not limited to, quality of management, tracking error, and cost.
Vanguard Total Intl Stock Index Admiral		This fund currently meets the guidelines set forth by CAPTRUST for passively managed investments. This assessment is based on both quantitative and qualitative data. Examples of quantitative and qualitative items considered include, but are not limited to, quality of management, tracking error, and cost.
Fidelity Small Cap Index		This fund currently meets the guidelines set forth by CAPTRUST for passively managed investments. This assessment is based on both quantitative and qualitative data. Examples of quantitative and qualitative items considered include, but are not limited to, quality of management, tracking error, and cost.

Qualitative Scoring for Target Date funds also includes a score for Portfolio Construction and Underlying Investment vehicles to express CAPTRUST's views on the manager or strategy. CAPTRUST typically requires at least 3 months of monitoring before including an investment in this report. Investments that have been added to our system less than 3 months prior to a report being generated may have a Fund Management assessment of '25' as a default, but will be updated, if necessary, after the first quarter of monitoring to more accurately reflect our system. Investments that are not mutual funds or have less than 3 years of performance history may not be scored. Capital Preservation options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics, depending on the type of capital preservation option being evaluated, and may include quantitative criteria such as: Crediting Rate/Yield, Market to Book Ratio, Average Crediting Quality, Insurer Quality/Diversification, Duration, and Sector Allocations, and/or qualitative criteria such as quality and experience of the Management Team and stewardship of the investment option's parent company. Passively Managed options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics and may include quantitative criteria such as: Tracking Error, Fees, and Performance versus relevant peer group, and/or qualitative criteria such as index replication strategy, securities lending practices, and fair value pricing methodology. Distinct investment options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics. This material is for institutional investor use only and is not intended to be shared with individual investors.

FUND MANAGEMENT ITEMS	COMMENTARY
American Beacon Small Cap Value	Coleman Hubbard, of sub-advisor Barrow Hanley (BHMS), was added to the American Beacon Small Cap Value Fund as a portfolio manager.
John Hancock Disciplined Value	While the strategy's Q1 2020 underperformance was disappointing, we were encouraged by the Q2 rebound vs. the index. Q3 results were a setback as its deeper value approach was a headwind. Year to date underperformance is driven by an overweight position and negative stock selection in financials and negative stock selection in healthcare. Notably, the strategy has positive stock selection in most other sectors including technology. The strategy is well positioned vs. the benchmark, as it has a lower valuation but better profitability. We do not believe there are any underlying issues with the investment process or team. The strategy has faced stylistic headwinds due to a stricter valuation discipline vs. some of its peers. The team is not deviating from their approach, as it has paid off in prior cycles. The team took numerous portfolio actions in the first half of 2020, which should position the strategy well when its approach comes back into favor. They took advantage of the Q1 sell-off to upgrade portfolio quality without sacrificing valuation. We believe that clients currently holding the strategy should continue to do so.
Parnassus Core Equity	Equity Research Analyst Minh Bui of the Parnassus Core Equity and Mid-Cap strategies has been named a portfolio manager on the Parnassus Fixed Income strategy. Mr. Bui maintains his role as an equity research analyst.
Vanguard International Growth	Effective 12/31/2020, we will change the strategy's classification from foreign large blend to foreign large growth. Morningstar changed its classification of the strategy from foreign large blend to foreign large growth in 2012, so this will align our classifications. The strategy, sub-advised by Schroders and Baillie Gifford, takes an aggressive approach to international markets. Vanguard previously utilized a third sub-advisor, M&G, who brought some valuation sensitivity to the portfolio. Since M&G's removal in 2016, the strategy's growth bias has become increasingly pronounced. Based on Morningstar's methodology, the portfolio is now further along the growth spectrum than both the MSCI ACWI ex-U.S. Growth index and foreign large growth peer group. Performance relative to the foreign large growth peer group has been very strong in recent years.

FUND MANAGEMENT ITEMS	COMMENTARY
T Rowe Price Retirement	<p>T. Rowe Price has changed the name of the U.S. Treasury Long-Term Fund to the T. Rowe Price U.S. Treasury Long-Term Index Fund. With this change, the strategy will cease to be an active strategy and become an index strategy. The strategy will keep the Bloomberg Barclays U.S. Long Treasury Bond Index as its benchmark. T. Rowe Price U.S. Treasury Long-Term is used in the firm's target date funds and it will continue to be used following its transition to an index strategy.</p> <p>T. Rowe Price has announced changes to its glidepath, underlying managers, and expense structure. The starting equity allocation is being increased to 98% from 90% and the ending equity allocation will be increased from 20% to 30%. The equity allocation at retirement will not change. T. Rowe Price U.S. Large-Cap Core and Emerging Markets Discovery Equity are being added to the manager line-up.</p>

FUND FIRM ITEMS	COMMENTARY
<p><b>T. Rowe Price</b></p>	<p>Mary Ann Picciotto recently joined T. Rowe Price in the new role of global head of Compliance. She was previously head of Compliance at OppenheimerFunds.</p> <p>Stephon Jackson was recently named associate head of U.S. Equity and joined the U.S. Equity Steering Committee.</p> <p>Ann Holcomb has been named director of Research, North America and joined the U.S. Equity Steering Committee. She will continue in her portfolio manager role for U.S. Structured Research and its associated strategies.</p> <p>Leigh Innes has been named director of research, EMEA and joined the International Steering Committee effective 7/1/2020.</p> <p>Paul Massaro has succeeded Mark Vasekiv as head of Global High Yield and joined the Fixed Income Steering Committee. Mr. Vasekiv continues in his role as CIO of Fixed Income.</p> <p>Ted Carter has assumed interim leadership for the Enterprise Risk Management, Business Risk, Global Privacy, and Business Resilience teams.</p> <p>Oliver Bell, currently co-head of EMEA Equity will expand his role and become associate head of International Equity, a new role at the firm, effective 1/1/2021.</p> <p>Chris Alderson, head of International Equity and co-head of Global Equity will retire from T. Rowe Price at the end of 2020. Justin Thompson, CIO of International Equity and lead portfolio manager of the International Small-Cap Equity and International Discovery strategies, will succeed Mr. Alderson as head of International Equity effective 1/1/2021. Mr. Thompson will also join the Management Committee.</p>
<p><b>PIMCO</b></p>	<p>PIMCO's Head of Client Management Americas Tom Otterbein, has retired from the firm. He continues to serve as a consultant to PIMCO moving forward. Current Head of U.S. Institutional Client Management Candice Stack, took over Mr. Otterbein's role.</p> <p>PIMCO offered a voluntary separation program to its employees that resulted in less than a 2% reduction in its workforce.</p>

FUND FIRM ITEMS	COMMENTARY
Nuveen Asset Management	<p>Tom Franks, head of Global Equities Portfolio Management, is leaving the firm. Saira Malik, Nuveen Global Equities CIO, has assumed Tom's personnel management responsibilities.</p> <p>Michael Ainge, group head of Research for Nuveen's Leveraged Finance team and portfolio manager for some funds, is leaving the firm at the end of the year. James Kim, head of Research at Symphony, will lead the newly combined Leveraged Finance Research team.</p> <p>TIAA is combining Symphony, one of the firm's subsidiary, with Nuveen's Leverage Finance team. The resulting group will have more than 50 investment professionals and over \$30 billion in AUM.</p> <p>As a result of the combination of Symphony and Nuveen's leveraged finance team, Jenny Rhee, head of High Yield at Symphony, has left the firm. Kevin Lorenz, a senior portfolio manager, will become head of High Yield for the combined group.</p> <p>Bill Martin, CIO of Global Fixed Income, is retiring from Nuveen at the end of 2020. He will be succeeded by Anders Persson, currently head of Global Fixed Income Portfolio Management.</p> <p>TIAA offered a voluntary separation program to its employees that resulted in a 10% total reduction in its workforce. The reduction was only 4-5% within Nuveen, the firm's investment arm.</p> <p>Martha Willis, previously Nuveen chief marketing officer, was named chief marketing officer for TIAA. She oversees marketing for TIAA, TIAA Bank, and Nuveen.</p> <p>Adam Cao, head of Quantitative Strategies, will depart the firm at the end of 2020 as part of the absorption of Nuveen's quantitative capabilities into the broader investment team.</p> <p>Nuveen Solutions, which had housed the portfolio management and research teams for the Lifecycle funds has been re-absorbed by the broader investment organization (Nuveen Equities and Fixed Income). As a result, Frank van Etten, head of Nuveen Solutions has left the firm.</p>

FUND FIRM ITEMS	COMMENTARY
FMR Corporation	<p>Fidelity has merged two of their business units serving wealth management firms and institutions - Fidelity Clearing &amp; Custody Solutions and FIAM - under the single Fidelity Institutional umbrella. Judy Marlinski, previously the head of FIAM, will lead the Product &amp; Advisory Solutions group. Sanjiv Mirchandani, previously the head of Fidelity Clearing &amp; Custody Solutions, will lead the Client Relationship group. Finally, Carolyn Clancy, previously the head of the broker-dealer segment in Fidelity Clearing &amp; Custody Solutions, will take on a new role leading Strategy, Analytics &amp; Market Readiness.</p> <p>Ian Baker, head of Fundamental and Quantitative Research, recently left Fidelity. As a result, Joe DeSantis has assumed a new role as head of Global Investment Solutions and the sector leaders and research analysts who reported to Mr. Baker now report to him.</p> <p>Ken Robins recently succeeded John McGinty as CCO for Fidelity's Fixed Income and Asset Allocation mutual funds and head of Compliance for FIAM. Mr. McGinty transitioned to a new senior role in Fidelity Institutional Compliance.</p> <p>Catriona Martin has been promoted to co-Chief Investment Officer alongside Robin Foley.</p> <p>Bill Irving, managing director of Research for Fidelity's Global Asset Allocation division has been named CIO of the group. He succeeds and will continue to report to Vadim Zlotnikov who was named president of FIAM in March 2020. Neville McCaghren has assumed Bill's former role of managing director of Research for GAA.</p>
MFS Family of Funds	<p>Effective 3/1/2022, Executive Chair Robert Manning will retire from MFS. At that time, CEO Michael Roberge will become executive chair and retain his role as CEO.</p> <p>Effective September 30, 2021, MFS Co-CIO of Equity for the Americas Kevin Beatty will retire. The other members of the MFS Co-CIO leadership team will remain in place.</p> <p>Barnaby Wiener has been named head of sustainability and stewardship at MFS. He will continue to maintain his current portfolio management responsibilities, and is supported by the firm's dedicated team of ESG analysts.</p>

This summary is intended for "Institutional (Plan Sponsor) Use Only" and only includes historical performance of the funds currently in the plan's fund lineup as compared to the peer group (universe) maintained/developed by CAPTRUST (using Morningstar open-end mutual fund data), which may include other investment types such as collective investment trusts. Fund and peer group returns are shown net of investment management fees, unless otherwise indicated, but gross of CAPTRUST advisory fees. The plan's overall performance will be reduced by CAPTRUST's advisory fees and other plan level fees not contemplated in this summary. Therefore, each participant's account performance will differ substantially. Past performance is not indicative of future results. Information from sources believed to be reliable, but not warranted by CAPTRUST to be accurate or complete.

## Investor Assumptions/Glidepath Methodology

Glidepath Management	• 30 years after retirement (assumed at age 67)
Assumed Investor Savings Rate:	• 15%, including company match
Assumed Investor Income Growth Rate	• This is not a factor in the glidepath design.
Income Replacement	• 55%
Assumed Accumulated Savings at Retirement	• 10X salary at retirement.
Life Expectancy	• Consistent with current mortality tables.
Asset Allocation Flexibility	• Strict targets with narrow ranges.
Other Assumptions	• None

All assumptions for salary, contributions, employer match, and investor balances have been derived from information collected from T. Rowe Price's own participant database from 2006-2009, consisting of 1.2 million records. Assumptions listed above are "base case" assumptions. The glide path was designed based upon proprietary Monte Carlo modeling that helped determine appropriate asset allocations for each stage of saving for retirement and for retirement itself. The objective is to create a glide path that achieves a high success rate of providing lifetime income and remaining purchasing power over a long time horizon in retirement.

## Target Asset Allocation Glidepath per Vintage Year

Important Disclosures: This slide is intended solely for institutional use. The opinions expressed in this report are subject to change without notice. The statistics and data have been compiled from sources believed to be reliable but are not guaranteed to be accurate or complete. Any performance quoted represents past performance and does not guarantee future results. Index averages are derived from Morningstar. This material is not a solicitation or an offer to buy any security or to participate in any investment strategy. Any such solicitation must be made by prospectus only. For more information or to obtain a prospectus, please contact your financial advisor at 800.216.0645. CAPTRUST Financial Advisors.

## Investment Profile

% Open Architecture:	0%	Active/Passive:	Active
Inception Date:	9-30-2002	% Active:	86%
Net Assets \$MM:	\$94,839	Manager Tenure:	18.08 Years (longest)
Manager Name:	Clark, Jerome	Expense Range:	0.37% - 1.21%
Avg # of Holdings:	18	Investment Structure:	Mutual Fund

## Dedicated Asset Class Granularity/Diversification

Emerging Market Equities	Yes
International/Global Debt	Yes
Inflation-Protected Securities	Yes
High Yield Fixed Income	Yes
Real Estate	No
Commodities	No

The equity exposure within the T. Rowe Price target date strategies is a broadly diversified allocation to a wide range of equity investments including U.S. international and real asset equities. Within the U.S. equity allocation, an allocation of 77% large-cap/ 12% mid-cap/ 11% small-cap is maintained. This allocation replicates the market capitalization breakdown of the broad U.S. equity market. Additionally, all capitalization segments have equal growth and value allocations. The international equity allocation is broken out to 85% developed markets and 15% emerging markets.

The fixed-income allocation is split into two primary categories - core fixed income and inflation-focused fixed income - where each sector contained has been chosen based on its historical performance, characteristics, and correlations with the other components of the strategies.

# T. ROWE PRICE RETIREMENT

Period Ending 9/30/2020

## Material Changes to the Series

2008:

- Added Emerging Markets Bonds & Non-US dollar bonds
- Rationale:
- Broaden FI exposure

2010:

- Added TIPs & Real Asset strategies
- Rationale:
- To hedge equity risk and inflation risk

2011:

- Increased Non-US equity allocation from 20% to 30%
- Rationale:
- International equity had become a greater % of the Global Market Cap

2017:

- Added hedged nondollar bonds, long duration U.S. treasuries, bank loans, and dynamic global bonds
- Rationale:
- To reduce overall portfolio risk, improve risk-return profile, and diversify the fixed income allocation.

2019

- Adding the Emerging Markets Discovery Stock fund and US Large Cap Core, as well as increasing equity allocation at the start of the glidepath from 90% to 98%, and on the back end from 20% to 30%.

Rationale:

- Provide clients with an opportunistic enhanced equity exposure

2020:

- Enhanced glidepath implementation begins Q2 2020 with a gradual transition to occur over a two-year time period.
- Rationale:
- Provide clients with sufficient growth to help achieve their long-term retirement goals, while providing a holistic approach to risk management.

\*All information provided by the asset manager, as of 12/31/19. Asset allocations shown are static in nature and do not incorporate any tactical views implemented by the manager.

TEAM MEMBERS	RESPONSIBILITIES
<b>Dori Drayton, CPA ,CFP®</b> Senior Vice President   Financial Advisor Dori.Drayton@captrust.com	<b>Account Role: Lead Consultant</b> Our Lead Consultants serve as the primary relationship manager for the fiduciaries of corporate retirement plans. They oversee and ensure quality delivery of comprehensive investment advisory services. They are available to assist with any aspect of clients' accounts, or put them in contact with the appropriate resources here at CAPTRUST.
<b>Anthony Bergstrom, CPFA</b> Client Management   Client Solutions Group Anthony.Bergstrom@captrust.com	<b>Account Role: Senior Advisor</b> Our Senior Advisors serve in strategic oversight roles on the CAPTRUST Account Team.
<b>Lisa Mason</b> Client Management   Client Solutions Group Lisa.Mason@captrust.com	<b>Account Role: Client Management Consultant</b> The Client Management Consultants are focused on overall client management from initial conversion of new plans to CAPTRUST throughout their 'life' at CAPTRUST. As the primary contact for day-to-day client service needs, the main goal of the Client Management Consultant is to deliver exceptional proactive client service. On a daily basis, the Client Management Consultants are available to assist employees with questions related to plan enrollment and education, available investment options, and other areas.

**ALPHA**

Alpha measures a manager's rate of return in excess of that which can be explained by its systematic risk, or Beta. It is a result of regressing a manager's returns against those of a benchmark index. A positive alpha implies that a manager has added value relative to its benchmark on a risk-adjusted basis.

**BATTING AVERAGE**

Batting Average, an indicator of consistency, measures the percentage of time an active manager outperformed the benchmark.

**BETA**

Beta measures a manager's sensitivity to systematic, or market risk. Beta is a result of the analysis regressing a manager's returns against those of a benchmark Index. A manager with a Beta of 1 should move perfectly with a benchmark. A Beta of less than 1 implies that a manager's returns are less volatile than the market's (i.e., selected benchmarks). A Beta of greater than 1 implies that a manager exhibits greater volatility than the market (i.e., selected benchmark).

**CAPTURE RATIO**

Up Market Capture is the average return of a manager relative to a benchmark index using only periods where the benchmark return was positive. Down Market Capture is the average return of a manager relative to a benchmark index using only periods where the benchmark return was negative. An Up Market Capture of greater than 100% and a Down Market Capture of less than 100% is considered desirable.

**INFORMATION RATIO**

The Information Ratio measures a manager's excess return over the passive index divided by the volatility of that excess return, or Tracking Error. To obtain a higher Information Ratio, which is preferable, a manager must demonstrate the ability to generate returns above its benchmark while avoiding large performance swings relative to that same benchmark.

**PERCENTILE RANK**

Percentile Rankings are based on a manager's performance relative to all other available funds in its universe. Percentiles range from 1, being the best, to 100 being the worst. A ranking in the 50th percentile or above demonstrates that the manager has performed better on a relative basis than at least 50% of its peers.

**RISK-ADJUSTED PERFORMANCE**

Risk-adjusted Performance, or RAP, measures the level of return that an investment option would generate given a level of risk equivalent to the benchmark index.

**R-SQUARED**

R-squared measures the portion of a manager's movements that are explained by movements in a benchmark index. R-squared values range from 0 to 100. An R-squared of 100 means that all movements of a manager are completely explained by movements in the index. This measurement is identified as the coefficient of determination from a regression equation. A high R-squared value supports the validity of the Alpha and Beta measures, and it can be used as a measure of style consistency.

**SHARPE RATIO**

Sharpe ratio measures a manager's return per unit of risk, or standard deviation. It is the ratio of a manager's excess return above the risk-free rate divided by a manager's standard deviation. A higher Sharpe ratio implies greater manager efficiency.

**STANDARD DEVIATION**

Standard Deviation is a measure of the extent to which observations in a series vary from the arithmetic mean of the series. This measure of volatility or risk allows the estimation of a range of values for a manager's returns. The wider the range, the more uncertainty, and, therefore, the riskier a manager is assumed to be.

**TRACKING ERROR**

Tracking Error is the standard deviation of the portfolio's residual (i.e. excess) returns. The lower the tracking error, the closer the portfolio returns have been to its risk index. Aggressively managed portfolios would be expected to have higher tracking errors than portfolios with a more conservative investment style.

**TREYNOR RATIO**

The Treynor Ratio is a measure of reward per unit of risk. With Treynor, the numerator (i.e. reward) is defined as the annualized excess return of the portfolio versus the risk-free rate. The denominator (i.e. risk) is defined as the portfolio beta. The result is a measure of excess return per unit of portfolio systematic risk. As with Sharpe and Sortino, the Treynor Ratio only has value when it is used as the basis of comparison between portfolios. The higher the Treynor Ratio, the better.

	QUANTITATIVE EVALUATION ITEMS	QUALITATIVE EVALUATION ITEMS
 <b>MARKED FOR REVIEW</b>  <b>The following categories of the Investment Policy Monitor appear “Marked For Review” when:</b>	<b>3/5 Year Risk- adjusted Performance</b>  The investment option’s 3 or 5 Year Annualized Risk Adjusted Performance falls below the 50th percentile of the peer group.	<b>Fund Management</b>  A significant disruption to the investment option’s management team has been discovered.
	<b>3/5 Year Performance vs. Peers</b>  The investment option’s 3 or 5 Year Annualized Peer Relative Performance falls below the 50th percentile of the peer group.	<b>Fund Family</b>  A significant disruption to the investment option’s parent company has been discovered.
	<b>3/5 Year Style</b>  The investment option’s 3 or 5 Year R-Squared measure falls below the absolute threshold set per asset class.	<b>Portfolio Construction</b>  The investment option’s combined Portfolio Construction score is 6 or below out of a possible 15 points.
	<b>3/5 Year Confidence</b>  The investment option’s 3 or 5 Year Confidence Rating falls below the 50 <sup>th</sup> percentile of the peer group.	<b>Underlying Investment Vehicles</b>  The investment option’s combined Underlying Investment Vehicles score is 6 or below out of a possible 15 points.
	<b>Glidepath Assessment</b>  % of Equity Exposure: The combined percentage of an investment option’s equity exposure ranks in the top 20th percentile or bottom 20th percentile of the peer group.  Regression to the Benchmark: The investment option’s sensitivity to market risk - as measured by beta relative to a Global Equity Index - is above 0.89.	

#### CAPTRUST’s Investment Policy Monitoring Methodology

The Investment Policy Monitoring Methodology document describes the systems and procedures CAPTRUST uses to monitor and evaluate the investment vehicles in your plan/account on a quarterly basis.

Our current Investment Policy Monitoring Methodology document can be accessed through the following link:

Appendix

SECTION 1: RETIREMENT INDUSTRY UPDATES	
Industry Updates.....	

## THE FINAL FRONTIER

The SECURE Act eliminated major barriers to the adoption of guaranteed retirement income investments in defined contribution plans, including fiduciary liability concerns for annuity provider selection and portability at the participant level. It also shed new light on the topic of retirement income at a time when more participants are keeping their assets in their employers' plans after retirement.

According to T. Rowe Price, in 2012 45% of participant assets remained in a plan at least one year after retirement. By 2018, that number had risen to 61%.<sup>1</sup> Data from the University of Michigan's Health and Retirement Study shows a similar story—between 2016 and 2018, only 13% of participants withdrew their entire plan balance or rolled it over to an IRA at retirement.<sup>2</sup> Given these trends, the topic of how best to help prepare participants for—and support them during—the decumulation stage of retirement is an important one.

1

### PARTICIPANT EDUCATION AND ADVICE

Participants need advice about the timing of Social Security benefits, budgeting, withdrawal strategies, creating an appropriate investment portfolio, and education around benefits of staying in the plan.

2

### WITHDRAWAL OPTIONS/PROGRAMS

Systematic or periodic withdrawal options are now more prevalent among plan sponsors. Some recordkeepers have built enhanced programs to support participants' withdrawal strategy needs. Some also offer out-of-plan annuity placement services.

3

### MANAGED ACCOUNTS

Managed account programs may offer pre-retirement planning assistance and post-retirement withdrawal strategy and Social Security recommendations.

4

### GUARANTEED INVESTMENTS

Guarantees can take the form of a guaranteed lifetime withdrawal benefit (GLWB), qualified longevity annuity contract (QLAC), or deferred fixed annuity. They can be integrated into a default solution or offered as a standalone. Fees vary widely.

5

### NON-GUARANTEED INVESTMENTS

Income-oriented strategies can include managed payout funds, yield-focused fixed income strategies, or through retirement target date funds.

# 68%

of plan participants reported a need for advice or support in managing a plan to convert retirement assets into a stream of income.<sup>1</sup>

<sup>1</sup>"Bridging the Gap Between Accumulation and Decumulation for Participants," T. Rowe Price, March 2020

<sup>2</sup>Health and Retirement Study (HRS Core) Public Data Set, University of Michigan

## PLAN SPONSOR CHECKLIST

Retirement income planning is a holistic concept centered around meeting the needs of participants in and nearing retirement. It's important for plan sponsors to understand all their options and what their plan providers can support. The solution for retirement income isn't one-size-fits-all, and it may include multiple options. Plan sponsors should focus on what option or options will meet the specific needs of their participants and help further a specific goal they're trying to achieve.

### QUESTIONS TO ASK WHEN SELECTING A RETIREMENT INCOME SOLUTION:

1. Do you want the solution to be offered in-plan or out-of-plan?
2. Should the solution be guaranteed?
3. Will the solution be offered as opt-in or opt-out?
4. How important is recordkeeper portability?
5. How important is participant liquidity?
6. Do you want unique solutions focused on accumulation and decumulation or prefer a single solution for both sets of needs?

### CONSIDERATIONS FOR RETIREMENT INCOME SOLUTIONS:

1. What are the implicit and explicit costs of the solution you're considering?
2. How will you communicate the solution to your participants (i.e., call center, website, quarterly statements, employee meetings, etc.)?
3. How will you measure effectiveness?
4. What are your fiduciary responsibilities related to selecting and monitoring your solution?
5. What kind of educational resources will you provide to participants at launch and ongoing?

## FIDUCIARY UPDATE

The IRS and the DOL have both been busy providing additional guidance for plan sponsors regarding the SECURE Act, and, as 2020 comes to a close, certain CARES Act provisions also come to an end.

### LIFETIME INCOME DISCLOSURE (INTERIM FINAL RULE)

The DOL has provided the assumptions to be used by parties producing benefit statements with monthly retirement payment illustrations. For DC plans, the payment is based on the person's current account balance. Key assumptions include:

- Commencement at age 67
- Spousal and survivor benefits
- Interest rate tied to the 10-year Treasury
- Mortality using a gender-neutral IRC table
- Expressed as a single life annuity and a qualified joint and survivor annuity

Additional rules apply for in-plan annuities. The rule is subject to a 60-day comment period that began September 18, 2020. The rule will be final on September 18, 2021.

### QUALIFIED BIRTH OR ADOPTION DISTRIBUTIONS (QBADS)

- Available since January 1 from multiple plan types for distributions taken within 12 months of the birth or adoption of an eligible adoptee. The guidance defines an eligible adoptee.
- Distribution is exempt from the 10% early withdrawal penalty.
- \$5,000 in aggregate per parent per birth or adoption.
- Distributions may be repaid. IRS to issue further guidance.
- QBADS cannot be rolled over.
- Classified as an optional distributable event so plans do not have to add the feature.
- Participants may claim QBADS even if their plans do not offer them. These may be repaid into an IRA.

### LONG-TERM, PART-TIME EMPLOYEE COVERAGE IN 401(K)S

- Effective beginning in 2021.
- Must be employed for 3 consecutive 12-month periods, with at least 500 hours each period. Employer contributions are not required; workers can be excluded from discrimination testing.
- If workers receive employer contributions, for vesting purposes, the employer must consider each 12-month period that the employee had 500 hours, starting from his or her hire date.

### CARES ACT REMINDERS

- Access to increased plan loan amounts ended September 23.
- Certain loan repayments may be delayed up to one year, but interest continues to accrue. Loan terms can be extended one year.
- Access to penalty-free early distributions for COVID-related events are available until December 30.
- Distributions may be repaid over three years beginning in 2020.

For more Fiduciary Updates, visit [captrust.com](https://captrust.com). Information contained here is provided for general information purposes and is not intended to constitute legal advice. Please contact your ERISA counsel to determine how the laws or cases discussed might apply to your plan, plan fiduciaries, or plan participants.

## FIDUCIARY UPDATE—DUTY OF PRUDENCE

Fiduciary training is a critical part of being a fiduciary and a way to minimize fiduciary risk through education and governance. The Department of Labor views fiduciary training as an important element to managing a retirement plan and frequently looks for evidence of formal fiduciary training during plan investigations. A good fiduciary curriculum covers a range of topics—from an overview of ERISA to best practices for monitoring investments. In this installment, we cover the duty of prudence, one of the core fiduciary duties required by ERISA.

### DUTY OF PRUDENCE

The duty of prudence is linked to the processes used to evaluate options, make decisions, and document actions. Fiduciaries should strive for a strong, consistent, and defined process that focuses on making sound fiduciary decisions in the best interest of participants. This approach will help a committee make good decisions and demonstrate both the processes and procedures they have in place and their commitment to fulfilling their fiduciary duties.

#### Prudent Expert

- The bar is high, and you are expected to make decisions demonstrating expertise.
- The Department of Labor encourages hiring experts if committee members do not possess the expertise needed to act in a fiduciary capacity.

#### Procedural Prudence

- Create and consistently follow a good process. Document the process and the decisions made through meeting reports and minutes, investment policy statements, benchmarks, and regular reports.
- Engage in the process by meeting regularly, vigorously discussing issues, and requiring training.

#### What Should Plan Fiduciaries Consider?

- Formalize meetings with agendas, record minutes, and hold ad hoc meetings as necessary.
- Select committee members with expertise that is beneficial in making plan decisions in the best interest of all employees.
- Require meeting attendance.

### FIDUCIARY DUTIES UNDER ERISA

- **Duty of prudence**
- Duty of loyalty
- Duty to diversify
- Duty to monitor and supervise
- Duty to ensure reasonable fees
- Duty to avoid prohibited transactions

SECTION 2: MARKET COMMENTARY AND REVIEW

Market Commentary.....

Market Review.....

Asset Class Returns.....

Index Performance.....

## STRONG Q3 RESULTS

Despite September's pullback, all asset classes have rallied from March's market lows, including solid gains in the third quarter. Historic levels of fiscal stimulus and monetary policy support buoyed markets mid-year, but uncertainties about the spread of COVID-19, a contentious election season, and the future of another round of stimulus have recently crept into investors' psyches.

- U.S. stocks posted strong gains in the third quarter and are now in positive territory for the year. A deeper look reveals a sharp contrast between this year's leading and lagging stocks.
- International developed and emerging market stocks rallied in the third quarter, but they trail U.S. stocks by a wide margin for the year. Emerging market stocks were the third quarter's standout performer, benefiting from China's economic recovery and a weaker U.S. dollar.
- Bonds have outpaced stocks so far this year and played an important portfolio stabilizer role as interest rates have fallen to historically low levels amid stock market volatility.
- While real estate typically benefits from falling interest rates, that has not been the case this year due to the impact of COVID-19-related office closures and the economic shutdown on the office and retail sectors.

Asset class returns are represented by the following indexes: S&P 500 Index (U.S. large-cap stocks), MSCI EAFE Index (international developed stocks), MSCI Emerging Markets Index (emerging market stocks), Bloomberg Barclays U.S. Aggregate Bond Index (U.S. bonds), and Dow Jones U.S. Real Estate Index (real estate).

## DIGGING DEEPER: STOCKS AND BONDS

### Equities

CAPTRUST

## DIGGING DEEPER: FIXED INCOME MARKET

Interest Rates	3 Months	2 Years	5 Years	10 Years	30 Years	Mortgage Rate
June 2020	0.16%	0.16%	0.29%	0.66%	1.41%	3.27%
September 2020	0.10%	0.13%	0.28%	0.69%	1.46%	3.08%
Change	-0.06%	-0.03%	-0.01%	0.03%	0.05%	-0.19%

Treasury rates remained roughly unchanged for the quarter after a precipitous drop earlier in the year. Mortgage rates declined, providing continued support to the housing market.

Bloomberg Barclays U.S. Aggregate Bond Index	Yield to Worst	Duration	Total Return Q3 2020	Spread	Treasury Rate	AA Spread	BBB Spread
June 2020	1.25%	6.04	0.62%	0.68%	0.57%	0.88%	1.98%
September 2020	1.18%	6.12		0.60%	0.58%	0.80%	1.76%
Change	-0.07%	0.08		-0.08%	0.01%	-0.08%	-0.22%

Although modest, the index's yield was the largest contributor to performance for the quarter. Corporate spreads, primarily BBB spreads, were also a significant return contributor.

Bloomberg Barclays U.S. Long Credit Index	Yield to Worst	Duration	Total Return Q3 2020	Spread	Treasury Rate	AA Spread	BBB Spread
June 2020	3.16%	15.03	1.97%	2.02%	1.14%	1.42%	2.51%
September 2020	3.05%	15.12		1.88%	1.17%	1.34%	2.32%
Change	-0.11%	0.09		-0.14%	0.03%	-0.08%	-0.19%

The decline in credit spreads, particularly BBBs, was the index's primary performance driver. The index's yield was also a meaningful contributor, outweighing a modest increase in Treasury rates.

Sources: Bloomberg, U.S. Treasury, CAPTRUST Research

## ECONOMIC OUTLOOK

Financial markets and some measures of economic activity have sharply improved since the first quarter. Here, we provide our perspective on the balance between the significant headwinds that remain and the tailwinds that could accelerate the economic healing process.

### HEADWINDS

#### Virus Threat Persists

- Virus cases are rising after a summer reprieve, underscored by positive test results for the U.S. president and first lady. This raises concerns over new restrictions, delayed reopenings, and continued challenges for the hardest-hit industries.

#### A Slower Jobs Recovery

- The U.S. economy added 11.4 million jobs between May and September, a rapid rebound from the spring. Yet this represents only half of the jobs lost in March and April—and gains from here are likely to be harder-won.

#### Stalled Relief Measures

- As relief measures wind down, political tensions risk stalling the next round of stimulus, posing risks to consumer income, confidence, and gross domestic product (GDP) recovery.

#### Elections

- Although history shows that markets can perform well under any division of power, investors continue to consider policy implications of election scenarios, along with the risks posed by the potential for a contested or delayed outcome.

### TAILWINDS

#### A Committed Fed

- After pulling out all the stops with pedal-to-the-metal stimulus in its initial response to the pandemic, the Federal Reserve has followed through with assurances that monetary support will persist.
- The recent policy shift toward “average inflation targeting” provides the Fed more flexibility to maintain exceptionally low policy rates for longer, to offset long periods of below-target inflation.

#### Housing Market Strength

- Fueled by record-low mortgage rates, home purchases and improvements remain a bright spot and contributor to economic recovery.
- Home sales reached a 14-year high as some buyers took advantage of record-low mortgage rates. At the same time, lower-than-usual inventory levels have fueled home price appreciation of more than 11% annually.

#### Lower Financing Costs Lightens Debt Burden

- Exceptionally low interest rates have helped blunt the impact of record levels of public and private borrowing.

While the COVID-19 virus remains a formidable headwind, given the backdrop of accommodative policy, meaningful progress on vaccines and an election resolution could fuel a continued recovery.

## ELECTIONS: MARKETS CAN PROSPER IN A VARIETY OF SCENARIOS

Polls are fluctuating as we enter the 2020 election season's home stretch. Much can change in the final weeks. Should there be changes in party control of the White House or Congress, policy changes could affect companies and industries in different ways. Even so, history tells us that markets can perform well under any combination of party control.

Average Annual S&P 500 Performance  
and Total Years of Scenarios  
(1933-2019, Excludes 2001-02)

### OBSERVATIONS

- The S&P 500 has achieved double-digit growth with both one-party and divided governments.
- Historically, the strongest returns have occurred with a split Congress, regardless of the party in the White House.
- The benefit of predicting election outcomes and acting on them in advance has proven uncertain—even if the predictions prove correct.
- Investors who correctly predicted President Trump's 2016 win and overweighted policy-favored sectors prior to the election would have underperformed investors who waited until after the election and those who made no changes at all.

Sources: Strategas, CAPTRUST Research. Returns are based on price index only and do not include dividends.

## LABOR MARKET RECOVERY: FROM BOUNCE TO GRIND

This spring, unemployment claims reached never-before-seen levels as a result of widespread lockdowns and efforts to contain the pandemic. Since then, initial claims for unemployment have shown a consistent downward trend—a positive sign. However, the rate of change has slowed considerably, suggesting that the second half of the jobs recovery may take much longer than the first.

### OBSERVATIONS

- Initial jobless claims fell rapidly through April and May, supported by massive fiscal stimulus packages.
- Since then, the rate of decline in initial claims has slowed.
- Additional fiscal stimulus efforts critical to continued jobs recovery have become bogged down in a pre-election political logjam. Without such a deal, airlines could be facing tens of thousands of job cuts.
- As the crisis continues, salaried and management-level jobs are increasingly at risk. Several major companies have announced job cuts, including Walt Disney, Allstate, and Goldman Sachs.

Source: Bloomberg

## NO PLACE LIKE HOME DURING THE PANDEMIC

A potent combination of forces has buoyed the housing market, creating a bright spot in the economy and providing support for jobs and income. Homebuyers have raced to take advantage of record-low mortgage rates, with the greatest demand in lower-cost and less-crowded suburban markets. Meanwhile, tighter inventory and input costs have propelled home prices to new highs as demand has outstripped supply.

### OBSERVATIONS

- Existing and new home sales surged to 14-year highs in August, and home prices have surpassed the 2007 housing bubble peak by 19%.
- New homes are not being built fast enough to meet demand. At the current rate, it would take just 3.3 months to exhaust supply, the shortest period on record. A six-month supply is considered a balanced market.
- Input costs are rising. Lumber prices have jumped more than 170% since mid-April, adding \$16,000 to the price of an average new home, driven by higher demand and supply shortages caused by mill shutdowns during the pandemic.
- The combination of low supply, high demand, and rising construction costs could impact home affordability despite mortgage rates below 3%. Over the past year, the rise in home prices has more than offset mortgage payment savings for the average home.

Sources: Bloomberg, National Association of Home Builders

## WIDENING GAP BETWEEN WINNERS AND LOSERS

Amid the unique challenges of a global pandemic, some companies and industries have prospered, while others have been severely impacted, a very uneven environment that has been described as a K-shaped recovery. This year, the price performance spread between the best-performing (technology) and worst-performing (energy) sectors has reached levels not seen since the tech bubble 20 years ago.

### OBSERVATIONS

- So far this year, the S&P 500's technology sector has shown price appreciation of 28% while the energy sector is down by 50%—a performance gap of 78%. This far exceeds the average spread of 44% over the past 30 years.
- Stock prices are influenced both by the level of earnings and by investors' willingness to pay for those earnings (valuations). As shown above, earnings growth expectations for sectors experiencing tailwinds in the current environment (e.g., technology, health care, and consumer staples) are vastly different from the more cyclical sectors most directly impaired by the crisis.
- Through 9.30, the five largest stocks within the S&P 500 showed a 32% gain, while the remaining 495 companies have declined 3%.

Sources: FactSet. Earnings growth is as of 9.25.2020. Bloomberg. 2020 performance is unannualized return as of 9.30.2020. Returns are based on price index only and do not include dividends.

The CAPTRUST Investment Policy Monitor ("Scorecard") is an illustration of our monitoring system and is designed to assist our clients in their efforts to provide fiduciary oversight to investment assets. It is not intended as a solicitation to buy any security. The scoring system measures quantitative areas as well as qualitative (or subjective) fields for actively managed investment options. Quantitative scoring areas include Risk Adjusted Performance (3 & 5 yr.); Performance vs. Relevant Peer Group; Style Attribution; and Confidence. Qualitative Scoring Areas measure the quality of the Management Team while also considering the stewardship of the investment option's parent company under Investment Family Items. Qualitative areas of analysis are subjective in nature. CAPTRUST typically requires at least 3 months of monitoring before including an investment in this report. Investments that have been added to our system less than 3 months prior to a report being generated may have a Fund Management assessment of '25' as a default, but will be updated, if necessary, after the first quarter of monitoring to more accurately reflect our system. Investments that are not mutual funds or have less than 3 years of performance history may not be scored. This material is for institutional investor use only and is not intended to be shared with individual investors.

The CAPTRUST Financial Advisors Investment Scorecard is an illustration of our monitoring system and is designed to assist our clients in their efforts to provide fiduciary oversight to investment assets. It is not intended as a solicitation to buy any security. The scoring system measures quantitative areas as well as qualitative (or subjective) fields. Quantitative scoring areas for target date funds include Risk Adjusted Performance (3 & 5 yr.); Performance vs. Relevant Peer Group; and Glidepath. Qualitative Scoring Areas for target date funds measure the quality of the Management Team while also considering the stewardship of the investment option's parent company under Investment Family Items. Qualitative areas of analysis are subjective in nature. Qualitative Scoring for Target Date funds also includes a score for Portfolio Construction and Underlying Investment vehicles to express CAPTRUST's views on the manager or strategy. CAPTRUST typically requires at least 3 months of monitoring before including an investment in this report. Investments that have been added to our system less than 3 months prior to a report being generated may have a Fund Management assessment of '25' as a default, but will be updated, if necessary, after the first quarter of monitoring to more accurately reflect our system. Investments that are not mutual funds or have less than 3 years of performance history may not be scored. Capital Preservation options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics, depending on the type of capital preservation option being evaluated, and may include quantitative criteria such as: Crediting Rate/Yield, Market to Book Ratio, Average Crediting Quality, Insurer Quality/Diversification, Duration, and Sector Allocations, and/or qualitative criteria such as quality and experience of the Management Team and stewardship of the investment option's parent company. Passively Managed options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics and may include quantitative criteria such as: Tracking Error, Fees, and Performance versus relevant peer group, and/or qualitative criteria such as index replication strategy, securities lending practices, and fair value pricing methodology. Distinct investment options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics. This material is for institutional investor use only and is not intended to be shared with individual investors.

## PASSIVE INVESTMENTS

FUND MANAGEMENT ITEMS	COMMENTARY
American Beacon Small Cap Value	Coleman Hubbard, of sub-advisor Barrow Hanley (BHMS), was added to the American Beacon Small Cap Value Fund as a portfolio manager.
John Hancock Disciplined Value	While the strategy's Q1 2020 underperformance was disappointing, we were encouraged by the Q2 rebound vs. the index. Q3 results were a setback as its deeper value approach was a headwind. Year to date underperformance is driven by an overweight position and negative stock selection in financials and negative stock selection in healthcare. Notably, the strategy has positive stock selection in most other sectors including technology. The strategy is well positioned vs. the benchmark, as it has a lower valuation but better profitability. We do not believe there are any underlying issues with the investment process or team. The strategy has faced stylistic headwinds due to a stricter valuation discipline vs. some of its peers. The team is not deviating from their approach, as it has paid off in prior cycles. The team took numerous portfolio actions in the first half of 2020, which should position the strategy well when its approach comes back into favor. They took advantage of the Q1 sell-off to upgrade portfolio quality without sacrificing valuation. We believe that clients currently holding the strategy should continue to do so.
Parnassus Core Equity	Equity Research Analyst Minh Bui of the Parnassus Core Equity and Mid-Cap strategies has been named a portfolio manager on the Parnassus Fixed Income strategy. Mr. Bui maintains his role as an equity research analyst.
Vanguard International Growth	Effective 12/31/2020, we will change the strategy's classification from foreign large blend to foreign large growth. Morningstar changed its classification of the strategy from foreign large blend to foreign large growth in 2012, so this will align our classifications. The strategy, sub-advised by Schroders and Baillie Gifford, takes an aggressive approach to international markets. Vanguard previously utilized a third sub-advisor, M&G, who brought some valuation sensitivity to the portfolio. Since M&G's removal in 2016, the strategy's growth bias has become increasingly pronounced. Based on Morningstar's methodology, the portfolio is now further along the growth spectrum than both the MSCI ACWI ex-U.S. Growth index and foreign large growth peer group. Performance relative to the foreign large growth peer group has been very strong in recent years.

FUND MANAGEMENT ITEMS	COMMENTARY
T Rowe Price Retirement	<p>T. Rowe Price has changed the name of the U.S. Treasury Long-Term Fund to the T. Rowe Price U.S. Treasury Long-Term Index Fund. With this change, the strategy will cease to be an active strategy and become an index strategy. The strategy will keep the Bloomberg Barclays U.S. Long Treasury Bond Index as its benchmark. T. Rowe Price U.S. Treasury Long-Term is used in the firm's target date funds and it will continue to be used following its transition to an index strategy.</p> <p>T. Rowe Price has announced changes to its glidepath, underlying managers, and expense structure. The starting equity allocation is being increased to 98% from 90% and the ending equity allocation will be increased from 20% to 30%. The equity allocation at retirement will not change. T. Rowe Price U.S. Large-Cap Core and Emerging Markets Discovery Equity are being added to the manager line-up.</p>

FUND FIRM ITEMS	COMMENTARY
T. Rowe Price	<p>Mary Ann Picciotto recently joined T. Rowe Price in the new role of global head of Compliance. She was previously head of Compliance at OppenheimerFunds.</p> <p>Stephon Jackson was recently named associate head of U.S. Equity and joined the U.S. Equity Steering Committee.</p> <p>Ann Holcomb has been named director of Research, North America and joined the U.S. Equity Steering Committee. She will continue in her portfolio manager role for U.S. Structured Research and its associated strategies.</p> <p>Leigh Innes has been named director of research, EMEA and joined the International Steering Committee effective 7/1/2020.</p> <p>Paul Massaro has succeeded Mark Vasekiv as head of Global High Yield and joined the Fixed Income Steering Committee. Mr. Vasekiv continues in his role as CIO of Fixed Income.</p> <p>Ted Carter has assumed interim leadership for the Enterprise Risk Management, Business Risk, Global Privacy, and Business Resilience teams.</p> <p>Oliver Bell, currently co-head of EMEA Equity will expand his role and become associate head of International Equity, a new role at the firm, effective 1/1/2021.</p> <p>Chris Alderson, head of International Equity and co-head of Global Equity will retire from T. Rowe Price at the end of 2020. Justin Thompson, CIO of International Equity and lead portfolio manager of the International Small-Cap Equity and International Discovery strategies, will succeed Mr. Alderson as head of International Equity effective 1/1/2021. Mr. Thompson will also join the Management Committee.</p>

FUND FIRM ITEMS	COMMENTARY
Nuveen Asset Management	<p>Tom Franks, head of Global Equities Portfolio Management, is leaving the firm. Saira Malik, Nuveen Global Equities CIO, has assumed Tom's personnel management responsibilities.</p> <p>Michael Ainge, group head of Research for Nuveen's Leveraged Finance team and portfolio manager for some funds, is leaving the firm at the end of the year. James Kim, head of Research at Symphony, will lead the newly combined Leveraged Finance Research team.</p> <p>TIAA is combining Symphony, one of the firm's subsidiary, with Nuveen's Leverage Finance team. The resulting group will have more than 50 investment professionals and over \$30 billion in AUM.</p> <p>As a result of the combination of Symphony and Nuveen's leveraged finance team, Jenny Rhee, head of High Yield at Symphony, has left the firm. Kevin Lorenz, a senior portfolio manager, will become head of High Yield for the combined group.</p> <p>Bill Martin, CIO of Global Fixed Income, is retiring from Nuveen at the end of 2020. He will be succeeded by Anders Persson, currently head of Global Fixed Income Portfolio Management.</p> <p>TIAA offered a voluntary separation program to its employees that resulted in a 10% total reduction in its workforce. The reduction was only 4-5% within Nuveen, the firm's investment arm.</p> <p>Martha Willis, previously Nuveen chief marketing officer, was named chief marketing officer for TIAA. She oversees marketing for TIAA, TIAA Bank, and Nuveen.</p> <p>Adam Cao, head of Quantitative Strategies, will depart the firm at the end of 2020 as part of the absorption of Nuveen's quantitative capabilities into the broader investment team.</p> <p>Nuveen Solutions, which had housed the portfolio management and research teams for the Lifecycle funds has been re-absorbed by the broader investment organization (Nuveen Equities and Fixed Income). As a result, Frank van Etten, head of Nuveen Solutions has left the firm.</p>

FUND FIRM ITEMS	COMMENTARY
MFS Family of Funds	<p>Effective 3/1/2022, Executive Chair Robert Manning will retire from MFS. At that time, CEO Michael Roberge will become executive chair and retain his role as CEO.</p> <p>Effective September 30, 2021, MFS Co-CIO of Equity for the Americas Kevin Beatty will retire. The other members of the MFS Co-CIO leadership team will remain in place.</p> <p>Barnaby Wiener has been named head of sustainability and stewardship at MFS. He will continue to maintain his current portfolio management responsibilities, and is supported by the firm's dedicated team of ESG analysts.</p>
PIMCO	<p>PIMCO's Head of Client Management Americas Tom Otterbein, has retired from the firm. He continues to serve as a consultant to PIMCO moving forward. Current Head of U.S. Institutional Client Management Candice Stack, took over Mr. Otterbein's role.</p> <p>PIMCO offered a voluntary separation program to its employees that resulted in less than a 2% reduction in its workforce.</p>

FUND FIRM ITEMS	COMMENTARY
FMR Corporation	<p>Fidelity has merged two of their business units serving wealth management firms and institutions - Fidelity Clearing &amp; Custody Solutions and FIAM - under the single Fidelity Institutional umbrella. Judy Marlinski, previously the head of FIAM, will lead the Product &amp; Advisory Solutions group. Sanjiv Mirchandani, previously the head of Fidelity Clearing &amp; Custody Solutions, will lead the Client Relationship group. Finally, Carolyn Clancy, previously the head of the broker-dealer segment in Fidelity Clearing &amp; Custody Solutions, will take on a new role leading Strategy, Analytics &amp; Market Readiness.</p> <p>Ian Baker, head of Fundamental and Quantitative Research, recently left Fidelity. As a result, Joe DeSantis has assumed a new role as head of Global Investment Solutions and the sector leaders and research analysts who reported to Mr. Baker now report to him.</p> <p>Ken Robins recently succeeded John McGinty as CCO for Fidelity's Fixed Income and Asset Allocation mutual funds and head of Compliance for FIAM. Mr. McGinty transitioned to a new senior role in Fidelity Institutional Compliance.</p> <p>Catriona Martin has been promoted to co-Chief Investment Officer alongside Robin Foley.</p> <p>Bill Irving, managing director of Research for Fidelity's Global Asset Allocation division has been named CIO of the group. He succeeds and will continue to report to Vadim Zlotnikov who was named president of FIAM in March 2020. Neville McCaghren has assumed Bill's former role of managing director of Research for GAA.</p>

This summary is intended for "Institutional (Plan Sponsor) Use Only" and only includes historical performance of the funds currently in the plan's fund lineup as compared to the peer group (universe) maintained/developed by CAPTRUST (using Morningstar open-end mutual fund data), which may include other investment types such as collective investment trusts. Fund and peer group returns are shown net of investment management fees, unless otherwise indicated, but gross of CAPTRUST advisory fees. The plan's overall performance will be reduced by CAPTRUST's advisory fees and other plan level fees not contemplated in this summary. Therefore, each participant's account performance will differ substantially. Past performance is not indicative of future results. Information from sources believed to be reliable, but not warranted by CAPTRUST to be accurate or complete.

## Investor Assumptions/Glidepath Methodology

Glidepath Management	• 30 years after retirement (assumed at age 67)
Assumed Investor Savings Rate:	• 15%, including company match
Assumed Investor Income Growth Rate	• This is not a factor in the glidepath design.
Income Replacement	• 55%
Assumed Accumulated Savings at Retirement	• 10X salary at retirement.
Life Expectancy	• Consistent with current mortality tables.
Asset Allocation Flexibility	• Strict targets with narrow ranges.
Other Assumptions	• None

All assumptions for salary, contributions, employer match, and investor balances have been derived from information collected from T. Rowe Price's own participant database from 2006-2009, consisting of 1.2 million records. Assumptions listed above are "base case" assumptions. The glide path was designed based upon proprietary Monte Carlo modeling that helped determine appropriate asset allocations for each stage of saving for retirement and for retirement itself. The objective is to create a glide path that achieves a high success rate of providing lifetime income and remaining purchasing power over a long time horizon in retirement.

## Target Asset Allocation Glidepath per Vintage Year

Important Disclosures: This slide is intended solely for institutional use. The opinions expressed in this report are subject to change without notice. The statistics and data have been compiled from sources believed to be reliable but are not guaranteed to be accurate or complete. Any performance quoted represents past performance and does not guarantee future results. Index averages are derived from Morningstar. This material is not a solicitation or an offer to buy any security or to participate in any investment strategy. Any such solicitation must be made by prospectus only. ## Investment Profile

% Open Architecture:	0%	Active/Passive:	Active
Inception Date:	9-30-2002	% Active:	86%
Net Assets \$MM:	\$94,839	Manager Tenure:	18.08 Years (longest)
Manager Name:	Clark, Jerome	Expense Range:	0.37% - 1.21%
Avg # of Holdings:	18	Investment Structure:	Mutual Fund

## Dedicated Asset Class Granularity/Diversification

Emerging Market Equities	Yes
International/Global Debt	Yes
Inflation-Protected Securities	Yes
High Yield Fixed Income	Yes
Real Estate	No
Commodities	No

The equity exposure within the T. Rowe Price target date strategies is a broadly diversified allocation to a wide range of equity investments including U.S. international and real asset equities. Within the U.S. equity allocation, an allocation of 77% large-cap/ 12% mid-cap/ 11% small-cap is maintained. This allocation replicates the market capitalization breakdown of the broad U.S. equity market. Additionally, all capitalization segments have equal growth and value allocations. The international equity allocation is broken out to 85% developed markets and 15% emerging markets.

The fixed-income allocation is split into two primary categories - core fixed income and inflation-focused fixed income - where each sector contained has been chosen based on its historical performance, characteristics, and correlations with the other components of the strategies.

# T. ROWE PRICE RETIREMENT

Period Ending 9/30/2019

## Material Changes to the Series

2008:

- Added Emerging Markets Bonds & Non-US dollar bonds
- Rationale:
- Broaden FI exposure

2010:

- Added TIPs & Real Asset strategies
- Rationale:
- To hedge equity risk and inflation risk

2011:

- Increased Non-US equity allocation from 20% to 30%
- Rationale:
- International equity had become a greater % of the Global Market Cap

2017:

- Added hedged nondollar bonds, long duration U.S. treasuries, bank loans, and dynamic global bonds
- Rationale:
- To reduce overall portfolio risk, improve risk-return profile, and diversify the fixed income allocation.

2019

- Adding the Emerging Markets Discovery Stock fund and US Large Cap Core, as well as increasing equity allocation at the start of the glidepath from 90% to 98%, and on the back end from 20% to 30%.

Rationale:

- Provide clients with an opportunistic enhanced equity exposure

2020:

- Enhanced glidepath implementation begins Q2 2020 with a gradual transition to occur over a two-year time period.
- Rationale:
- Provide clients with sufficient growth to help achieve their long-term retirement goals, while providing a holistic approach to risk management.

\*All information provided by the asset manager, as of 12/31/19. Asset allocations shown are static in nature and do not incorporate any tactical views implemented by the manager.

TEAM MEMBERS	RESPONSIBILITIES
<b>Dori Drayton, CPA ,CFP®</b> Senior Vice President   Financial Advisor Dori.Drayton@captrust.com	<b>Account Role: Lead Consultant</b> Our Lead Consultants serve as the primary relationship manager for the fiduciaries of corporate retirement plans. They oversee and ensure quality delivery of comprehensive investment advisory services. They are available to assist with any aspect of clients' accounts, or put them in contact with the appropriate resources here at CAPTRUST.
<b>Anthony Bergstrom, CPFA</b> Client Management   Client Solutions Group Anthony.Bergstrom@captrust.com	<b>Account Role: Senior Advisor</b> Our Senior Advisors serve in strategic oversight roles on the CAPTRUST Account Team.
<b>Lisa Mason</b> Client Management   Client Solutions Group Lisa.Mason@captrust.com	<b>Account Role: Client Management Consultant</b> The Client Management Consultants are focused on overall client management from initial conversion of new plans to CAPTRUST throughout their 'life' at CAPTRUST. As the primary contact for day-to-day client service needs, the main goal of the Client Management Consultant is to deliver exceptional proactive client service. On a daily basis, the Client Management Consultants are available to assist employees with questions related to plan enrollment and education, available investment options, and other areas.

**ALPHA**

Alpha measures a manager's rate of return in excess of that which can be explained by its systematic risk, or Beta. It is a result of regressing a manager's returns against those of a benchmark index. A positive alpha implies that a manager has added value relative to its benchmark on a risk-adjusted basis.

**BATTING AVERAGE**

Batting Average, an indicator of consistency, measures the percentage of time an active manager outperformed the benchmark.

**BETA**

Beta measures a manager's sensitivity to systematic, or market risk. Beta is a result of the analysis regressing a manager's returns against those of a benchmark Index. A manager with a Beta of 1 should move perfectly with a benchmark. A Beta of less than 1 implies that a manager's returns are less volatile than the market's (i.e., selected benchmarks). A Beta of greater than 1 implies that a manager exhibits greater volatility than the market (i.e., selected benchmark).

**CAPTURE RATIO**

Up Market Capture is the average return of a manager relative to a benchmark index using only periods where the benchmark return was positive. Down Market Capture is the average return of a manager relative to a benchmark index using only periods where the benchmark return was negative. An Up Market Capture of greater than 100% and a Down Market Capture of less than 100% is considered desirable.

**INFORMATION RATIO**

The Information Ratio measures a manager's excess return over the passive index divided by the volatility of that excess return, or Tracking Error. To obtain a higher Information Ratio, which is preferable, a manager must demonstrate the ability to generate returns above its benchmark while avoiding large performance swings relative to that same benchmark.

**PERCENTILE RANK**

Percentile Rankings are based on a manager's performance relative to all other available funds in its universe. Percentiles range from 1, being the best, to 100 being the worst. A ranking in the 50th percentile or above demonstrates that the manager has performed better on a relative basis than at least 50% of its peers.

**RISK-ADJUSTED PERFORMANCE**

Risk-adjusted Performance, or RAP, measures the level of return that an investment option would generate given a level of risk equivalent to the benchmark index.

**R-SQUARED**

R-squared measures the portion of a manager's movements that are explained by movements in a benchmark index. R-squared values range from 0 to 100. An R-squared of 100 means that all movements of a manager are completely explained by movements in the index. This measurement is identified as the coefficient of determination from a regression equation. A high R-squared value supports the validity of the Alpha and Beta measures, and it can be used as a measure of style consistency.

**SHARPE RATIO**

Sharpe ratio measures a manager's return per unit of risk, or standard deviation. It is the ratio of a manager's excess return above the risk-free rate divided by a manager's standard deviation. A higher Sharpe ratio implies greater manager efficiency.

**STANDARD DEVIATION**

Standard Deviation is a measure of the extent to which observations in a series vary from the arithmetic mean of the series. This measure of volatility or risk allows the estimation of a range of values for a manager's returns. The wider the range, the more uncertainty, and, therefore, the riskier a manager is assumed to be.

**TRACKING ERROR**

Tracking Error is the standard deviation of the portfolio's residual (i.e. excess) returns. The lower the tracking error, the closer the portfolio returns have been to its risk index. Aggressively managed portfolios would be expected to have higher tracking errors than portfolios with a more conservative investment style.

**TREYNOR RATIO**

The Treynor Ratio is a measure of reward per unit of risk. With Treynor, the numerator (i.e. reward) is defined as the annualized excess return of the portfolio versus the risk-free rate. The denominator (i.e. risk) is defined as the portfolio beta. The result is a measure of excess return per unit of portfolio systematic risk. As with Sharpe and Sortino, the Treynor Ratio only has value when it is used as the basis of comparison between portfolios. The higher the Treynor Ratio, the better.

## **SUMMARY OF PURPOSE AND OBJECTIVES**

### **Plan Purpose and Objectives**

The Livingston County 457(b) Deferred Compensation Plan ("Plan") was originally adopted effective November 1<sup>st</sup>, 1987 and covers the participants according to the terms of the Plan document, with the objective of offering participants the opportunity to save, manage, accumulate and preserve retirement account assets.

This Investment Policy Statement is issued by the Board of Commissioners of Livingston County (the "Commissioners"). The Commissioners have authorized the Retirement Plan Advisory Committee (the "Committee") to administer specific functions of the Plan, outlined herein and effective as of the date on which this Investment Policy Statement is acknowledged by the Commissioners.

All of the Plan assets are invested at the discretion of the participant, or if permitted, their beneficiary, in investment options selected from a group of alternatives made available by the Plan. The number and types of investment alternatives available and the investment managers retained to manage the alternatives are subject to change. Decisions regarding investment options will be made in the sole interest of the participants and beneficiaries of the Plan.

The provisions of this Investment Policy Statement are subject to the terms of the Plan, the agreement establishing the trust maintained pursuant to the Plan, the charter under which the Committee is organized (if applicable), and any relevant investment advisory agreement. To the extent of any conflict, the terms of such Plan, agreement, charter, or investment advisory agreement control. This Investment Policy Statement does not provide any additional rights to any party other than those that are described in those documents.

### **Purpose of the Investment Policy Statement**

The purpose of this Investment Policy Statement is to assist the Committee in effectively selecting, supervising, and evaluating the investment options provided under the Plan. The primary focus of this Investment Policy Statement is to:

1. Outline the criteria to select and monitor the investment options under the Plan.
2. Effectively manage the selection of investment options under the Plan.

The Committee will formally review this Investment Policy Statement periodically. Any modifications to this Investment Policy Statement will be reviewed and discussed with the appropriate parties prior to implementation.

## **ROLES AND RESPONSIBILITIES**

### **Plan Participants**

Plan participants are responsible for making their own investment decisions based on their own retirement goals, risk tolerances and savings/investment time horizons.

### **Livingston County Retirement Plan Advisory Committee**

The Committee is broadly responsible to oversee the administration of the Plan and investment of the Plan assets. Its duties include executing this Investment Policy Statement, adding, removing, or replacing funds within the Plan, and monitoring and evaluating the performance of service providers in carrying out this Statement.

### **Livingston County Staff**

The appropriate staff of Livingston County, as designated by Livingston County from time to time, is responsible for the day-to-day administrative duties of the Plan and providing the Committee with appropriate information to fulfill its responsibilities.

### **Investment Consultant**

The primary role of the Investment Consultant is to assist the Committee in fulfilling its responsibilities by providing information, analysis and a prudent process that contribute to the success of the investment program. The Investment Consultant is responsible for assisting the Committee in selecting investment options available to Plan participants and ongoing monitoring of investment options. The Investment Consultant is also responsible for assisting the Committee with respect to analyzing fees and summarizing fees paid to various service providers, educating and updating the Committee on investment issues that might impact the Plan, and various other services identified in its Investment Advisory Agreement.

### **Custodian (Directed Trustee)**

The primary role of the Custodian is to provide adequate safekeeping of the assets along with suitable accounting services and reporting. The Custodian also provides proxies for voting when received from mutual funds and investment managers and any other services listed in the Custodial Services Agreement.

### **Third Party Administrator (TPA)/Record Keeper**

The TPA/Record Keeper is responsible for daily administration services along with compliance testing and document filing services in accordance with regulations, and for making accurate and timely plan data accessible to the Committee and staff. The TPA/Record Keeper also provides participant services including but not limited to: web or phone access to account information and planning tools, access to phone representatives, quarterly statements and other services listed in the TPA/Record Keeper Service Agreement.

### **Investment Managers**

The role of each Investment Manager is to manage the Plan assets under its supervision in accordance with guidelines and objectives included in each Investment Manager's agreement, or in accordance with the prospectus for mutual funds and consistent with each Investment Manager's stated investment philosophy and style as presented to the Committee/Investment Consultant. Each Investment Manager also exercises investment discretion in regard to buying, managing and selling assets held in the portfolio, subject to any limitations contained in this document and the Investment Manager's agreement or prospectus.

See the Plan's quarterly report for a listing of Investment Managers.

## **INVESTMENT OPTION POLICIES**

### **Selection of Investment Options**

The Committee will determine, through an understanding of eligible participants, an appropriate number and type of investment options to offer, and which specific Investment Manager to employ for each investment option.

### **Default Investment**

The discretionary assets of participants who do not make an active selection among the available investment options will be placed in the Plan's Qualified Default Investment Alternative ("QDIA"). Permissible QDIA options were reviewed by the Committee, in consultation with the Investment Consultant. The Committee may determine, with the help of the Investment Consultant, to replace the QDIA with another permissible option.

## **PERFORMANCE OBJECTIVES**

### **Time Horizon**

The Committee acknowledges that fluctuating rates of return characterize the securities markets, particularly during short-term time periods. Accordingly, the Committee focuses on

time horizons of three years and greater (e.g. a full market cycle) in evaluating the asset class and investment option performance relative to established benchmarks.

### **Performance Objectives**

Based on the analysis that led to asset allocation and/or investment option decisions, the Committee has identified performance benchmarks for each investment option and the separate mandates within multiple manager options.

The Plan's investment options will be selected to:

1. Seek to achieve an appropriate return given the level of risk.
2. Provide investment returns comparable to returns for investment options having similar investment objectives and risk profiles.
3. Provide a diverse portfolio of investment options covering a range of asset classes.
4. Control administrative and management costs.

## **INVESTMENT OPTION SELECTION AND EVALUATION**

### **Investment Option Selection**

The Committee's intent is to follow a process that embodies the principles of procedural due diligence. Accordingly, when selecting investment options, the Committee, with the assistance of the Investment Consultant, will employ a competitive search process, which includes the following steps:

1. Identification of qualified candidates from Investment Manager search databases maintained by the Investment Consultant or an independent third party.
2. Analysis of qualified candidates in terms of quantitative, qualitative and organizational factors.
3. Selection of finalist candidates based on a due diligence process. Investment options should meet the following minimum criteria:
  - Investment options should correspond to the asset classes appropriate and prudent for eligible Plan participants.
  - The Investment Manager should have a track record managing assets with a similar style.
  - In aggregate, the various share classes of the investment options should have total assets that are sufficient to avoid an excessive concentration of plan assets in the strategy.
  - Options should have a net expense ratio that is lower than the median (50th percentile) of their peer group unless above median expenses are justified for other reasons or factors. (e.g. long-term risk adjusted performance, revenue sharing credits).

### **Performance Evaluation and Review**

With the assistance of the Investment Consultant, the Committee will regularly evaluate the performance of each investment option. In evaluating each investment option, the Committee will consider qualitative factors likely to impact the future performance of the investment option in addition to current and historical quantitative factors.

With the assistance of the Investment Consultant, the Committee has deemed it appropriate to establish objective standards for conducting a review of an Investment Manager.

Some of the conditions that may be considered include:

1. Organizational disruption such as manager changes or material client-servicing problems.
2. Long-term underperformance (defined as five years) in relation to an appropriate broad market index, the median of an appropriate peer group, and risk. If an investment option fails to generate a return premium net of fees in excess of the designated index or indices, performs below the median (50<sup>th</sup> percentile) of its peer group, and/or has below average alpha (compared to its peer group), then, upon completion of appropriate due diligence, the Committee may decide to eliminate that investment option under the Plan.
3. Shorter-term performance in relation to appropriate style index and the median of an appropriate peer group. A due diligence review process, which may lead to termination, should be initiated if an investment option ranks in the 4<sup>th</sup> quartile over a one-year period.

As a result of any formal or informal review, the Committee may decide, in its sole discretion to (i) take no action, (ii) monitor the investment option more closely for a period of time, or (iii) remove the investment option.

## SERVICE PROVIDER SELECTION AND EVALUATION

In carrying out the policies of this Investment Policy Statement, the Committee may rely on various service providers, in addition to the Investment Managers, including, but not limited to: the Investment Consultant, Custodian, Third Party Administrator, and/or firms providing Plan participants individual investment advice or account management. Such service providers generally shall be evaluated and selected based on the following:

**Furthering the Objectives of the Plan in a Cost-Effective Manner.** Each service provider is intended to further the objectives of the Plan described in this Investment Policy Statement. The service providers shall be expected to deliver administratively efficient services and charge fees that are reasonable given the service(s) provided.

**Core Business Commitment and Expertise.** Service providers are intended to have a history of providing services to other retirement plans and its management should demonstrate an ongoing commitment to such business, and its employees should have a reputation among its clients for the quality of its services. The firm should show an appropriate knowledge of applicable statutes and regulations. It should also be able to understand and communicate the Plan sponsor's business culture.

**Fiduciary Status and Conflicts of Interest.** To the extent required based on the services being provided to the Plan, the service provider shall acknowledge its role as a fiduciary to the Plan. Service providers are expected to disclose any potential conflicts of interest to the Committee.

## INVESTMENT FEES AND REVENUE SHARING

The Committee, with the assistance of the Investment Consultant, will analyze investment fees, including revenue sharing, on a periodic basis to determine reasonableness of fees for services provided.
