### Resolution Authorizing a Reduction in the Multiplier Used for Building Permit Fee Calculations and Other Adjustments in the Permit Fees for the Building Department

**WHEREAS,** Public Act 230, *aka the Construction Code Act*, requires that permit fees "bear a reasonable relation to the cost" of services; and

**WHEREAS,** the Building Department currently operates with approximately half the staffing level of the previous high growth year of 2005 / 2006 and current department permit activity and inspections have increased exponentially each year since 2010; and

**WHEREAS,** although the new construction permit fee multiplier was reduced by 25% in 2017, due to higher efficiencies combined with increased activity, the department fund balance is still at an amount which justifies adjustments in the permit fees; and

**WHEREAS,** the Building Official recommends another 25% reduction in the multiplier used for building permit fee calculations in addition to other adjustments in the permit fees for the Building Department as outlined in the attached Building Department Fee Schedule.

**THEREFORE BE IT RESOLVED** that the Livingston County Board of Commissioners hereby approves the recommendation of the Building Official to lower the multiplier by 25% that is used in the calculations for new construction permit fees until December 31, 2021, after which time the multiplier will return to the current rate and all other fee adjustments will remain lowered.

**BE IT FURTHER RESOLVED** that the Building Department permit fees will be as outlined in the attached Building Department Fee Schedule.

**BE IT FURTHER RESOLVED** that these permit fees will take effect on December 1, 2018.

#### **RE: REDUCTION OF PERMIT FEES**

### **History of Legal Use of Permit Fees:**

Permit revenue can only be used to fund building department operations. A building department should operate within its means however building departments are not allowed to make a profit.

PA230 of 1972 AKA, the Construction Code Act states in part:

"125.1522 Fees; state construction code fund; fund for purchase and sale of codes and standards. Sec. 22.

(1) The legislative body of a governmental subdivision shall establish reasonable fees to be charged by the governmental subdivision for acts and services performed by the enforcing agency or construction board of appeals under this act, which fees shall be intended to bear a reasonable relation to the cost, including overhead, to the governmental subdivision of the acts and services, including, without limitation, those services and acts as, in case of an enforcing agency, issuance of building permits, examination of plans and specifications, inspection of construction undertaken pursuant to a building permit, and the issuance of certificates of use and occupancy, and, in case of a board of appeals, hearing appeals in accordance with this act. The enforcing agency shall collect the fees established under this subsection. The legislative body of a governmental subdivision shall only use fees generated under this section for the operation of the enforcing agency or the construction board of appeals, or both, and shall not use the fees for any other purpose."

In 2016, the building department lowered the multiplier used to calculate permit fees by 25%. In 2017, the department:

- Lowered the multiplier used to calculate permit fees by another 25%
- Reduced the majority of fixture based fees
- Created a sliding fee scale for higher valued commercial projects.
- Eliminated unnecessary permits such as replacement windows and doors

The purpose of the fee reductions are to lower the increasing fund balance. However, permit revenue for the first three quarters of 2018 has resulted in an additional increased revenue adding to the fund balance. Therefore we propose to reduce the fees once again. Prior to reducing fees this time, we have analyzed our fee structure and compare it to the effort required to issue and complete each permit to determine where fees may be the most excessive. Our goal is not only to reduce permit

revenue, but match revenue with staff effort. We have determine the following changes would be appropriate.

### 1. Reduce the Overhead Multiplier:

Fees for calculated construction projects are based on values established by the International Code (ICC) standards. The department is currently using the February 2011 valuation data. Once a project value is determined, the permit value is calculated using a multiplier that represents the building department's overhead i.e. the cost of providing services. We propose to reduce this multiplier 25% from .00356 to .00267. This change in the multiplier will lower the fees for all new buildings, residential and commercial construction which result in an increase in size or footprint. The multiplier will be reduced from .00356 to .00267. This fee adjustment will affect:

- New residential buildings and residential additions
- New commercial buildings and commercial additions
- New garages, pole barns and storage type buildings

The process to calculate a new construction project is:

ICC Data Valuation \* the square footage of the proposed project \* the overhead multiplier.

To illustrate the impact of the lower fees on our customers, permits for 3 typical projects commonly reviewed and permitted by the building department have been calculated below. Two are single family residential homes with garages and 1 is a new commercial retail / retail building.

### Project #1

2000 square foot single family home 2000 square foot unfinished basement 600 square foot garage Permit fee with current multiplier \$809 Permit fee with new multiplier \$607 Difference -\$202

### Project #2

3500 square foot single family home 3500 square foot finished basement 800 square foot garage Permit fee with current multiplier \$1868 Permit fee with new multiplier \$1401 Difference -\$467

#### Project #3

12,000 square foot, commercial retail store
Permit fee with current multiplier \$4544
Permit fee with new multiplier \$3408
Difference -\$1136

### 2. Reduce the fixture based fees

Fees for mechanical and electrical permits are fixture based. The revenue for these types of permits account for approximately 29% of our revenue but with much less effort. Most of these permits require only 1 or 2 inspections to complete.

### **Resolution Summary:**

We are respectfully requesting approval to amend the fees as described above. We hope to reduce the fund balance and create fees that more closely represent the department's efforts. A new proposed fee schedule is included in an attachment.

Respectfully,

Jim Rowell Building Official

#### **Policies and Procedures**

#### **Permits Expiration**

Permits will expire when inactive for 180 days. Activity is determined by inspection requests. When an inspection has been approved, permits will be extended for an additional 180 days for that trade (only). If an inspection does not pass, the permit expiration will not be extended.

#### **Permit Extensions**

Building Permits can be extended 1 time at no cost for 180 days with good cause demonstrated to the building official. Additional extensions will be decided on a case by case basis as decided by the code official. Expired permits cannot be extended. Extended permits must be reviewed prior to approval.

### Permit Cancellation Refund Policy for Projects Not Started

Full refunds will be issued for permits where work has not begun. Plan review fees are non-refundable unless the permit is withdrawn prior to the beginning of the plan review.

### **Approved Permits Not Picked Up**

Staff will call the applicants at the time permits have been reviewed and approved for issuance. The department will hold these permits for 180 days. After that time, the department will contact the applicant. If contact cannot be made, the permit will be nullified and the documents will be shredded. No refunds will be given on completed plan reviews. Future submissions will be the same as required for new applications.

### **Re-inspection Fees**

A re-inspection fee of \$50 will be applied to all trades for work that is incomplete, incorrect, not ready or when the inspector is locked out. The Building Official or his designee can waive the fee for good cause.

### **Permit Transfer Policy**

Definition: When an owner changes contractors for a project that is already permitted by another contractor.

Refunds will be given to the party that paid the fee to the County. The fee will be given based on a percentage of the required inspections not completed. The new contractor must obtain a new permit.

EXAMPLE: Project with 5 required inspections and 2 inspections completed will receive a 60% refund minus the plan review cost. The new contractor taking over the project will be charged 60% of the original permit cost – no plan review fee will be charged unless significant changes are proposed. Cancellations will not be allowed for projects partially built unless another contractor has applied for a permit to take over the project.

#### **Continuation Permit**

Definition: A permit that qualifies for a continuation permit is a permit that has expired because of lack of activity and / or a permit that has not been extended and allowed to expire.

Continuation permits for building permits (only) will be \$75 plus the number of required inspections x \$30 each. If a continuation permit is requested in another entities name, the cost and process will be the same fee as required for new work for the unfinished portion (only). After 2 years, the building official may request all new permits at the cost of new permits.

### Policies (continued)

#### **Changes or Modifications to an Existing Permit or a Continuation Permit**

If a permit can be modified by a staff member at the counter there will be no charge. If a permit requires changes significant enough to require re-entry into the plan review que, the cost will be determined by the plan reviewer, based on effort, not to exceed \$75.

#### Adding Additional Work to an Existing Permit or Continuation Permit

If the scope for additional work requires re-entry into the plan review que, the plan review and permit costs will be the same costs as required for new work.

\_\_\_\_\_\_

### **Permit Holder's Agents**

Any person applying for or picking up permits on behalf of a permit applicant must present documents authorizing them to act on behalf of the permit applicant for the intended task. The document shall be signed by and dated by the permit applicant and signed and notarized by a licensed Notary Public. The notarized document shall bear the seal or stamp of the Notary. The agent shall present photo identification satisfactory to the building department. The Building Department reserves the right to deny an Agent's request based on incomplete or unclear submittals.

### **Homeowner's Permit Policy**

A permit can be issued to a homeowner for their own use and occupancy if the applicant owns the property and the property is registered in the applicant's name.
