Re: Resolution – To reorganize the Equalization Department

Three years ago the Equalization Department had a Senior Appraiser position open and attempted to fill it. After several months of trying to fill the position, I chose to hire someone with little experience but working to achieve the MCAO (2) designation. He achieved that designation and went further to receiving his MAAO (3) designation. He now qualifies for that Senior Appraiser position. This not an attempt to enlarge the department but to satisfy the ability of the department to conduct quality appraisal studies and work with the local units. One current Appraiser position will be removed.
