SIX GOOD FAITH EFFORTS, 40 CFR, Part 33, Subpart C

Pursuant to 40 CFR, Section 33.301, the recipient agrees to make the following good faith efforts whenever procuring construction, equipment, services and supplies under an EPA financial assistance agreement, and to require that sub-recipients, loan recipients, and prime contractors also comply. Records documenting compliance with the six good faith efforts shall be retained:

- (1) Ensure DBEs are made aware of contracting opportunities to the fullest extent practicable through outreach and recruitment activities. For Indian Tribal, State and Local and Government recipients, this will include placing DBEs on solicitation lists and soliciting them whenever they are potential sources.
- (2) Make information on forthcoming opportunities available to DBEs and arrange time frames for contracts and establish delivery schedules, where the requirements permit, in a

way that encourages and facilitates participation by DBEs in the competitive process. This includes, whenever possible, posting solicitations for bids or proposals for a minimum of 30 calendar days before the bid or proposal closing date.

(3) Consider in the contracting process whether firms competing for large contracts could subcontract with DBEs. For Indian Tribal, State and local Government recipients, this will include dividing total requirements when economically feasible into smaller tasks or quantities to permit maximum participation by DBEs in the competitive process.

(4) Encourage contracting with a consortium of DBEs when a contract is too large for one of these firms to handle individually.

(5) Use the services and assistance of the SBA and the Minority Business Development Agency of the Department of Commerce.

(6) If the prime contractor awards subcontracts, require the prime contractor to take the steps in paragraphs (a) through (e) of this section.

BIDDERS LIST, 40 CFR, Section 33.501(b) and (c)

Recipients of an EPA financial assistance agreement to capitalize a revolving loan fund also agree to require entities receiving identified loans to create and maintain a bidders list if the recipient of the loan is subject to , or chooses to follow, competitive bidding requirements. Please see 40 CFR, Section 33.501 (b) and (c) for specific requirements and exemptions.

(G) Signage

(H) Geospatial Data Standards

All geospatial data created must be consistent with Federal Geographic Data Committee (FGDC) endorsed standards. Information on these standards may be found at www.fgdc.gov.

(I) Cybersecurity

(a) The recipient agrees that when collecting and managing environmental data under this assistance agreement, it will protect the data by following all applicable State law cybersecurity requirements.

(b) (1) EPA must ensure that any connections between the recipient's network or information system and EPA networks used by the recipient to transfer data under this agreement, are secure. For purposes of this Section, a connection is defined as a dedicated persistent interface between an Agency IT system and an external IT system for the purpose of transferring information. Transitory, user-controlled connections such as website browsing are excluded from this definition. If the recipient's connections as defined above do not go through the Environmental Information Exchange Network or EPA's Central Data Exchange, the recipient agrees to contact the EPA Project Officer (PO) and work with the designated Regional/Headquarters Information Security Officer to ensure that the connections meet EPA security requirements, including entering into Interconnection Service Agreements as appropriate. This condition does not apply to manual entry

of data by the recipient into systems operated and used by EPA's regulatory programs for the submission of reporting and/or compliance data. (2) The recipient agrees that any sub-awards it makes under this agreement will require the sub-recipient to comply with the requirements in (b)(1) if the sub-recipient's network or information system is connected to EPA networks to transfer data to the Agency using systems other than the Environmental Information Exchange Network or EPA's Central Data Exchange. The recipient will be in compliance with this condition: by including this requirement in sub-award agreements; and during sub-recipient monitoring deemed necessary by the recipient under 2 CFR 200.331(d), by inquiring whether the sub-recipient has contacted the EPA Project Officer. Nothing in this condition requires the recipient to contact the EPA Project Officer on behalf of a sub-recipient or to be involved in the negotiation of an Interconnection Service Agreement between the sub-recipient and EPA.

(J) Quality Management Plan

In accordance with 2 CFR 1500.11, the recipient shall continue to implement and adhere to the Quality Management Plan (QMP) submitted to EPA. The QMP should be updated annually or as necessary based on the EPA QA/R-2: EPA Requirements for Quality Management Plans. This quality assurance requirement applies to all grants, cooperative agreements, contracts, and interagency agreements that involve the use of environmental data. If not included under the approved QMP, a stand-alone QAPP is required for those projects/activities that result in the collection, production and/or use of environmental information, metrics, or data. The recipient agrees to ensure that an approved site specific QAPP is completed for each project. No environmental data collection, production, or use may occur until the QAPP is reviewed and approved by the EPA Project Officer and Quality Assurance Regional Manager or through authorized delegation under an EPA approved recipient QMP based on procedures documented in the QMP. A copy of the approved QAPPs must be retained with the recipient's official records for this Agreement.

As described in Public Law 115-232, section 889, covered telecommunications equipment is telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities). Recipients, subrecipients, and borrowers also may not use EPA funds to purchase:

Consistent with 2 CFR 200.471, costs incurred for telecommunications and video surveillance services or equipment such as phones, internet, video surveillance, and cloud servers are allowable except for the following circumstances:

Title to equipment or other nonexpendable personal property supported in whole or in part by the State with categorical funding and having a unit acquisition cost of less than \$5,000 shall vest with the Grantee upon acquisition. The State reserves the right to retain or transfer the title to all items of equipment and nonexpendable personal property having a unit acquisition cost of \$5,000 or more to the extent that it is determined that the State's proportionate interest in such equipment and personal property supports such retention or transfer of title.

1. Conduct sanitary surveys, issue water well permits, and have inspections for compliance or enforcement purposes performed by qualified individuals classified as sanitarians or equivalent.
2. Assign one individual to be responsible for operational training and reporting aspects of this agreement and to coordinate communication with the assigned State staff.
3. Maintain a current inventory of all noncommunity public water supplies within its jurisdiction using the WaterTrack (WT) data system and revised total coliform rule tracking required for federal reporting.
4. Provide program oversight for required water quality monitoring and reporting at noncommunity public water supplies in accordance with Act 399. The water supply owner shall be advised of the applicable monitoring requirements at the time of completion of a sanitary survey, final approval of a water well permit, or the effective date of the requirement. Notices of violation of required monitoring, maximum contaminant level (MCL) violations, or the occurrence of unregulated compounds shall be provided to the owner and the State in a timely manner. Notices of violation shall include the contaminant, public health effects information, specific precautionary measures, and public notice requirements, where applicable, as required in Act 399.
5. Ensure that repeat samples are collected promptly where initial sample results indicate a potential violation of State drinking water standards; or where the sample analyses are unreliable due to overgrowth, excessive transit time, thermal preservation requirements are not met, or where the presence of organic chemical contamination is indicated.
6. All noncommunity water supplies shall undergo a sanitary survey at least once every five years in accordance with the procedures and regulations established by the State. An accurate and

complete sanitary survey form, water well record where available, and transmittal letter to the owner outlining compliance status and monitoring requirements shall be considered a completed sanitary survey as required in Act 399. All sanitary survey and well record data shall be entered into the program database(s) within 45 days of the survey.

7. 8. Conduct a reinspection within ten (10) days of the expiration date of the compliance schedule to ensure that all violations have been corrected and provide documentation of the results of the reinspection to the owner. If compliance has not been achieved, initiate enforcement in accordance with procedures established by the State.
9. Consult with the State in situations where the noncommunity public water supply injects a chemical into the water supply, provides treatment for public health purposes, utilizes a surface water source, or is found to be providing water that exceeds an MCL or contains unregulated organic compounds. Assist treatment operators, review operation reports, and conduct and document in WT (see Staff Reference Manual) site visits for treatment surveillance. The frequency at which treatment surveillance must occur is as follows: F-level treatment for surface water or groundwater under the direct influence of surface water – two (2) visits per year, D-level treatment such as chemical injection or removal of arsenic or nitrate – one (1) visit per year, Continuous Permanent Public Notice posting at certain Nitrate MCL systems with SO6 code – one (1) visit per year; Arsenic bottled water treatment alternative – one (1) visit per three (3) years. In rare instances, if current staff resources suitably trained to conduct surveillance visits are unavailable, the Grantee may make a written request by June 30 to reduce temporarily the number of surveillance visits to be conducted (described in more detail in the Staff Reference Manual).
10. Take prompt action to protect the public health and pursue compliance with applicable construction, public notice, and water quality standards when an inspection establishes that sewage, surface water, chemicals, or other serious contamination can gain entrance into the noncommunity public water supply; when there is a confirmed MCL violation; or when a Level 2 Assessment is required at a noncommunity water supply.
11. Review permit applications and issue permits prior to the construction of any new or altered noncommunity water well(s) as required in Act 399 and in accordance with procedures established by the State. Noncommunity well permits shall be issued on forms provided by the State.

Withhold the construction permit if the owner does not demonstrate adequate TMF capacity in accordance with procedures established by the State.

13. Perform at least one post-construction inspection of all new noncommunity water wells for which a permit has been issued. Final inspection and authorization for use of the noncommunity public water supply by the public shall be accomplished in accordance with Act 399 and procedures established by the State.
14. Provide the well owner with notification of the results of the final inspection report and status of compliance and establish the appropriate future monitoring schedule as required in Act 399.
15. Obtain requests for deviations from suppliers of water where necessary and evaluate and approve or deny deviations prior to the construction in accordance with procedures established by the State and set forth in R 325.1613 of the Groundwater Quality Control Rules, promulgated pursuant to Part 127, Water Supply and Sewer Systems, of the Public Health Code, 1978 PA 368, as amended (Act 368); and R 325.10809 of the Safe Drinking Water Act, 1976 PA 399, as amended (Act 399) Rules.
