RE: Resolution Authorizing a Budget Amendment to the Asphalt Replacement Project at the West Complex with Allied Construction – Facility Services Department

The contract with Allied Construction for the asphalt replacement at the West Complex has begun. During the removal process in the Law Center parking lot, it was discovered that the soils are in poor condition. G2 Engineering conducted a test on compaction and recommended a 10" undercut with a backfill of 21AA.

The original contract was a total of $232,540 with a 20% contingency for undercut of poor soils and unforeseen conditions.

The total amount of contingency spent so far is $8,695 leaving $37,813, the total cost of the proposed under cut is $152,390

Therefore, Facility Services is requesting that the attached resolution be approved that authorizes a budget amendment for $114,577. If you have any questions or concerns, please feel free to contact me.
