Jail Camera Upgrades

Description	QTY	Brand	Model		Total
LABOR Project: upgrade 99 old analog cameras to modern IP cameras. Pull new Ethernet wire to each camera. Install new camera. Program each camera, add to system. Build out head end racks for termination. Clean out old wire from IT rooms.	Note: All equipment for this project will be provided by Securitas Inc. with the exception of the equipment listed below. They will also provide some PLC programing. Securitas is the corporation that has traditionally handled much of our jail security and is best suited to do PLC programing, commander programing, and network managment in the jail.				\$ 56,000.00
UPS power backup units for each SEC to accommodate switches powering cameras	2	Eaton	5PX1500RTG2	\$ 975.00	\$ 1,950.00
Indoor Camera Back Box Junction Boxes	55	Hanwah	SBV-136BW	\$ 39.50	\$ 2,172.50
Cat 5e Ethernet Wire, solid copper	1	Approx.. 17000 feet - Any brand		\$ 2,660.00	\$ 2,660.00
All required conduit, misc. supplies, termination parts, keystone jacks, equipment racks, patch cords, travel, mileage, lift rental	1			\$ 1,935.00	\$ 2,245.00

System Price **\$ 65,027.50**

Note: Plenum wire not requested as return air is not an architectural plenum.

Note: Securitas to provide all switches and cameras.
