Project Title
JROTC for the Brighton Area Schools

Project Description *Please attach additional pages with supplemental information if necessary

The Brighton Area Schools is requesting assisting to launch a JROTC program to be housed at Brighton High School beginning with the 2024-25 school year. This county has one JROTC program at Howell High School that is available to county students, but the logistics are challenging for students in the South and Eastern sections of the county. Brighton has applied for a program through the Navy, Marines and Army (Howell offers Air Force JROTC). We are hopeful to be approved for a self-funded program for the fall of 2024. Brighton is seeking creative options to make such a program available to as many county students as possible including the use of zero or 7th hours (BAS schedule is a 6 hour day) as well as flexible scheduling. In order to launch such a program, Brighton will need seed money to help with materials and staffing as we work to create a sustainable program available to all BAS students as well as county residents through the consortium program. Your consideration is greatly appreciated.

Project Timeline
Official launch - September of 2024

Total Amount Of Funding Requested
\$150,000
