Yes (5): H. Austin, L.A. Blazejewski, T. Latchney, N. McGuire, D. Smith;

No (0): none; Absent (0): none

Motion Carried (5-0-0)

Recorded by, Thomas Latchney

Facts About Michigan's Non-Opioid Directive Legislation

FOR IMMEDIATE RELEASE: APRIL 8, 2022

Contact: Matt McCord, MD, Opioid Free Solutions and Opioid Free Surgery, (810)623-4703.

About the Non-Opioid Directive

The Non-Opioid Directive law gives Michigan patients the right to deny treatment with opioids. It requires health professionals and insurers to inform patients of their right to refuse opioids and to provide accessible documentation for this directive. The law aims to address the opioid epidemic, which took thousands of lives in Michigan, including 2,591 deaths in 2018.

Key Legislative Components of the Non-Opioid Directive

1. **HB 5261**
 - Mandates procedures for recording a non-opioid directive form in a patient's medical record, including electronic medical records, to ensure healthcare professionals are informed of a patient's refusal of opioids.
 2. **HB 5262**
 - Requires insurers operating in Michigan to provide a non-opioid directive form to insured individuals during enrollment. This ensures all insured patients have the opportunity to access and complete this directive.
 3. **HB 5263**
 - Obligates insurers to make the non-opioid directive form available on their websites, enhancing accessibility for patients and making the process more transparent and user-friendly.
 4. **HB 5264**
 - Compels hospitals to publicly post the non-opioid directive form on their websites. This enables patients to easily find, sign, and submit the directive as part of their medical care preferences.
-

Implementation and Supporting Legislation

- The laws were signed by Governor Gretchen Whitmer on **March 23, 2022**.
- The legislation was part of a broader set of healthcare bills addressing the opioid crisis.
- Prominent leaders, including state officials, union representatives, and healthcare professionals, have voiced support for these measures.
