## Memorandum

**To:** Livingston County Board of Commissioners

**From:** Lieutenant Tarneseia Pringle

**Date:** April 11, 2025

**Re:** Resolution Authorizing Livingston County Jail to Enter into a bundle contract for Tasers, Body Cameras, and Jail Fleet Camera Services

As we approach the end of our current contract with Axon Enterprise Inc., we have revisited the services they provide to the Livingston County Sheriff's Office. Over the past decade, the Livingston County Jail has been under contract with Axon to provide tasers, cartridges, and training. Over the years, additional hardware and software items have been added, resulting in the jail and Axon serving different payment and upgrade schedules and requirements.

We are seeking to acquire 17 updated Tasers (Model T-10) that will enable all our transport deputies, as well as some of our jail deputies, to carry them while on duty. Tasers have, through our experience, allowed our staff to maintain safety and security during jail operations, minimizing the risk of injuries to both inmates and staff.

We also seek the addition of two body cameras for the hospital guard and high-risk inmate transports, as well as two in-car fleet cameras for our federal transport vans. We are confident that these additional measures will significantly enhance the safety and security of our staff and inmates and result in liability protection for the county.

We respectfully request the board's approval for the Livingston County Jail to enter into a five-year agreement with Axon Enterprise, Inc. This agreement is crucial to the safe operation of our facility and will protect both staff and inmates. The authorization of this Resolution will ensure a smooth transition to improved and uninterrupted service from the provider.

If you have any questions, please don't hesitate to contact me.

Respectfully Submitted,

Lt. Tarneseia Pringle

Jail Administrator
